TECNICAL DATA SHEET

PROTECT 700

ANTISPATTER SILICON-FREE FOR AUTOGENS WELDING

CHEMICAL BASE

Composition	:Synthetic oil , silicone – free.
Colour	:Yellow clear.
Viscosity at 25 °C	: 30-100 cSt (brookfield)
Resistance to temperature	: - 2 / + 200 °C
Biodegradability	: over to 80 %
Diluibility in	: water in all proportion
pH	: 7/8
Not inflammable, not toxic, odourless.	

APPLICATION

PROTECT 700 is a liquid antispatter used to prevent the adesion of the drosses and of the drops on the automatic welding.

This products does not have silicone and so it permits the superficial successive treatments (painting, galvanizations, chromium-plating) .

PROTECT 700 can be used in closed place (environmetal ecc.) because it is not flammable or toxic.

It can be diluited in water until 1 to 5: for robot welders it is advisable to diluite the product 1:1 in water; for application with a pump it is possible to use the product pure or diluited 1:1

DIRECTIONS FOR USE

Spray with a gun or appling with a brush on the surface to treat or on the welding guns.

MANUFACTURE

Cod.10650/50

packing 25 - 50 - 200 - 1000 KG..

The manufaturer cannot be held responsabile in case of dammages caused by correct or incorrect use of the product.
