# A new era of abrasive performance is here.

Introducing 3M re-engineered Precision-Shaped Grain, boosting the speed and life of 3M™ Cubitron™ Performance Abrasives to new heights. This advancement prioritises operator safety, maximises sustainability and amplifies time and labour efficiency.

3M™ Cubitron™ 3 Fibre Disc 1182C, 36+

Up to

60%

→ **Faster sustained cut rate**  
→ **More total material removed**

vs. 3M™ Cubitron™ II Fibre Disc 982C, 36+

## Enhanced mineral orientation

## Re-shaping the way work gets done.

**Cubitron™ 3**  
Performance Abrasives

### Our latest 3M Precision-Shaped Grain

Re-engineered precision-shaped ceramic triangular grain using a proprietary breakthrough in grain shape. This helps increase productivity and lower overall grinding costs.

### 3M Precision-Shaped Grain

3M pioneered the first precision-shaped grain using 3M microreplication technology to form consistent sharp peaks that easily slice through metal – cutting cooler, faster and lasting longer than conventional abrasive grain.

### Conventional ceramic abrasive

Conventional ceramic abrasive grain tends to plough through metal, causing heat to build up in the workpiece and abrasive, resulting in a slower cut and shorter abrasive life compared to our latest precision-shaped grain.

# Ideal for heavy grinding applications.

By using long-lasting, fast-cutting 3M™ Cubitron™ 3 Performance Abrasives, you can minimise abrasive changeover to save money over time. A stiff fibre backing and a strong resin bond provide durability and tear-resistance for heavy grinding applications from beveling, weld grinding, surface grinding to deburring and flame cut smoothing. In each application the product grinds more freely and at lower temperatures, helping to reduce job times, operator fatigue and minimise rework.

Industries: ▶ Metal fabrication ▶ Machinery manufacturing ▶ Shipyards

# Proven to change the game for your process.

## 3M™ Cubitron™ 3 Fibre Disc 1182C

Carbon steel grinding

Grade **36+**

### More total material removed

Longer lasting  
abrasives with fewer  
changeouts needed  
and less downtime

### Less operator fatigue

Prioritise workplace  
wellbeing and  
motivation with less  
pressure required on  
the tool

### Cool cutting

Helps to reduce  
metal discolouration  
and stress cracks  
— ultimately  
minimising re-work

### Faster cut rate

Incredibly fast cut rate  
helps to increase  
throughput, maximise  
productivity and boost  
your bottom line

### Less vibration exposure

Helps improve  
workplace safety  
without compromising  
productivity

### Sustainability at the core

Longer-lasting  
abrasives and recycled  
shipper packaging  
helps reduce carbon  
footprints and waste

## 3M™ Cubitron™ 3 Fibre Disc 1187C

Stainless steel grinding

Grade **36+**

### Coated with a grinding aid

Reduces the risk of discoloration  
from thermal damage in heat  
sensitive metals

Grade 36+

We tested 3M™ Cubitron™ 3 Fibre Disc 1182C, 36+ and here are the results:

Productivity  
Delivered

Up to  
**36%** Faster  
sustained  
cut rate<sup>1</sup>

Up to  
**34%** More total  
material  
removed<sup>1</sup>

Up to  
**3x** Faster  
initial  
cut rate<sup>2</sup>

Helps improve workplace safety without  
compromising productivity.

Safety  
Built In

Up to  
**88%** Less  
vibration  
exposure<sup>2</sup>

Up to  
**70%** Less noise  
energy  
generated<sup>3</sup>

Up to  
**47%** Less  
vibration  
exposure<sup>4</sup>

Error bars represent the results with a 95% confidence level.

<sup>1</sup> Compared to Competitive Shaped Grain Fibre Disc. Results are based on an automated, 30-minute, high pressure test on 1018 steel using 7 inch, 36+ grit fibre discs and 3M™ Disc Pad Face Plate Ribbed 80514 on a servo motor.

<sup>2</sup> Performance testing in a typical weld preparation process; 3M™ Cubitron™ 3 Fibre disc average compared to the average result of 10 globally available high-quality competitive shape type-27 Grinding wheels including ceramic grain products, according to independent testing by Fraunhofer Institute. January 2024.\*\*

<sup>3</sup> Noise energy operator exposure testing in a typical weld preparation process; Cubitron™ 3 Fibre disc average compared to the average result of 10 globally available high-quality competitive shape type-27 Grinding wheels including ceramic grain products, according to independent testing by Fraunhofer Institute. January 2024.

<sup>4</sup> Performance testing in a typical weld preparation process; 3M™ Cubitron™ 3 Fibre disc average compared to the average result of 5 globally available high-quality competitive Fibre discs including ceramic shaped grain products, according to independent testing by Fraunhofer Institute. January 2024.

<sup>5</sup> Average result from 10 high-quality globally represented competitive Grinding wheels including ceramic grain products. Error bars shows a range of likely values for the mean with a confidence level of 95%.

 **Fraunhofer**

# 3M™ Cubitron™ 3 Fibre Disc 1182C

Carbon steel grinding

Grades 60+ & 80+

**NEW!**

We tested 3M™ Cubitron™ 3  
Fibre Disc 1182C 60+ and 80+,  
and here are the results:

**Productivity  
Delivered**

## Grade 60+

Up to  
**53%** More total  
material removed<sup>1</sup>

Up to  
**69%** Faster  
sustained cut rate<sup>2</sup>

## Grade 80+

Up to  
**55%** More total  
material removed<sup>1</sup>

Up to  
**60%** Faster  
sustained cut rate<sup>2</sup>

### Total material removed:

60+ Carbon Steel: The 'total material removed' claim is determined by averaging the amount of metal ground over 100 cycles, approximately 42 minutes of grinding.  
80+ Carbon Steel: The 'total material removed' claim is determined by averaging the amount of metal ground over 70 cycles, approximately 30 minutes of grinding.

Units for carbon steel will be grams

Each cycle for the carbon steel test method = 25.3 seconds of grinding per cycle

### Sustained cut rate:

60+ and 80+ Carbon Steel: The 'sustained cut rate' claim is determined from averaging the cut/cycle from cycles 11 – 50 (40 cycles total, which is approximately 17 minutes of grinding)

# 3M™ Cubitron™ 3 Fibre Disc 1187C

Stainless steel grinding

Grades 60+ and 80+

**NEW!**

We tested 3M™ Cubitron™ 3  
Fibre Disc 1187C 60+ and 80+  
and here are the results:

**Productivity  
Delivered**

## Grade 60+

Up to  
**207%** More total  
material  
removed<sup>1</sup>

Up to  
**228%** Faster  
sustained  
cut rate<sup>2</sup>

## Grade 80+

Up to  
**166%** More total  
material  
removed<sup>1</sup>

Up to  
**155%** Faster  
sustained  
cut rate<sup>2</sup>

### Total material removed:

60+ Stainless Steel: The 'total material removed' claim is determined by averaging the amount of metal ground over 40 cycles, approximately 8.5 minutes of grinding.  
80+ Stainless Steel: The 'total material removed' claim is determined by averaging the amount of metal ground over 72 cycles, approximately 15 minutes of grinding.

Units for stainless steel will be grams  
Each cycle for the stainless steel test method = 12.7 seconds of grinding per cycle

### Sustained cut rate:

60+ and 80+ Stainless Steel: The 'sustained cut rate' claim is determined from averaging the cut/cycle from cycles 5 – 24 (20 cycles total, which is approximately 4 minutes of grinding).  
Units for stainless steel will be (Grams/cycle)

# Tools that take it to the next level.

The new 3M™ Electric Grinder is available in 115mm, fixed speed. Designed with robust components, this grinder is built for durability in the harshest industrial conditions. A powerful and long-lasting tool you need to get more done.

- ▶ 1900 W power
- ▶ Available in fixed speed
- ▶ Excellent ergonomic design
- ▶ Restart protection
- ▶ Direct cooling for a long service life
- ▶ Overload protection
- ▶ Kickback control
- ▶ Adjustable guard
- ▶ Robust design and components provide durability in industrial conditions
- ▶ Accessories for maximum functionality and flexibility

## Get the full system advantage.

### 3M™ Electric Grinder

### 3M™ Disc Back-up Pads ideal use

Grade  
36+

Grades  
60+  
80+

### TECH TIP:

Combine with 3M™ Fibre Disc Back-up Pads and 3M™ Electric Grinder to optimise performance of 3M™ Cubitron™ 3 Fibre Discs 1182C and 1187C including abrasive life, cut rate and consistency.

# Get more value from your automation investment.

Automation  
Ready

There are many reasons to invest in automating your abrasive processes: improvement gains in productivity; increase in consistency, quality and safety; and an answer to your labour shortage. To ensure maximised ROI from your investment, the best path comes from automating correctly from the start. That's where 3M products and engineering expertise come in.

## The limitations of manual operation.

Manual operators are constrained by the amount of force they can apply and the angles they can hold a tool. Automation removes many of these constraints, working consistently and repeatedly at targeted angles and an optimised level of force and speed. A robot however, is still constrained by the abrasives it's running.

## The vital importance of the right abrasives and process parameters in automation.

To realise the full ROI on your automation investment, you want to optimise your abrasive products and parameters for these four key elements:

- ▶ **Uptime:** Determined by abrasive life and full utilisation of abrasive, change-over frequency is a key factor here
- ▶ **Throughput:** Determined by abrasive performance, faster processing leads to more part throughput
- ▶ **Consistency:** Determined by performance through the life of the abrasive product, resulting in, increased finished good quality and less change-over
- ▶ **Efficiency:** 3M Robotic Application Engineers can help design a process that utilises the full width of the abrasive. Reducing abrasive waste and cost

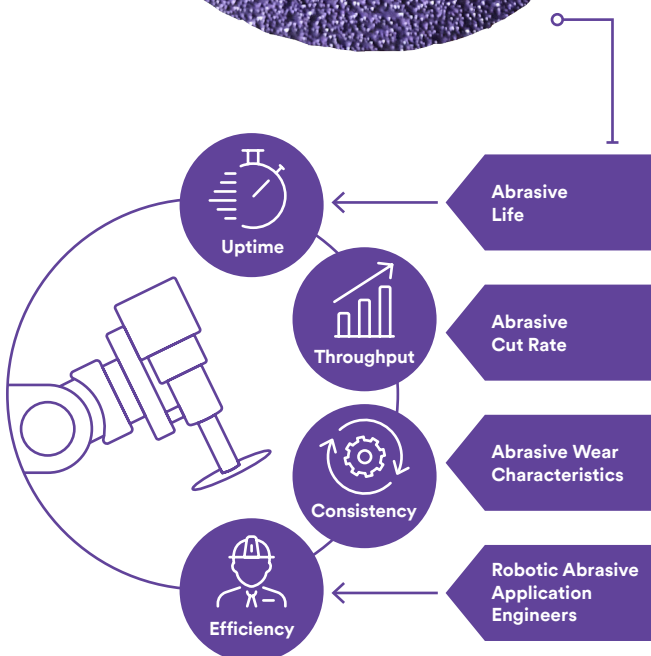

At 3M, we have a deep understanding of the factors that affect an automated abrasive process. Our 100+ years of abrasive experience and 35+ years of abrasive automation experience is accessible through our Technical Experts, our 17 Global Proof of Concept automation labs, and deployed into how we engineer our products

## Products engineered with automation in mind.

3M™ Cubitron™ 3 Performance Abrasives elevate product life, cut rate, and wear consistency. This enhances processes that are already automated or increases the appeal of automating current manual ones.

## Start your journey with 3M.

We know abrasive automation. We start with your part requirements in mind and offer consultation on the entire cell system; including recommendations on hardware and software, connections to partners in our 3M System Integrator Network, and running proof of concept projects in our labs; to meet the needs of your process.

# 3M™ Cubitron™ 3 Roloc™ Fibre Discs

## The benefits of the Roloc™ attachment

3M™ Roloc™ Abrasive Discs are smaller discs that quickly attach onto a 3M™ Roloc™ disc pad so that you can conveniently and rapidly change discs as needed. Our system provides a secure attachment

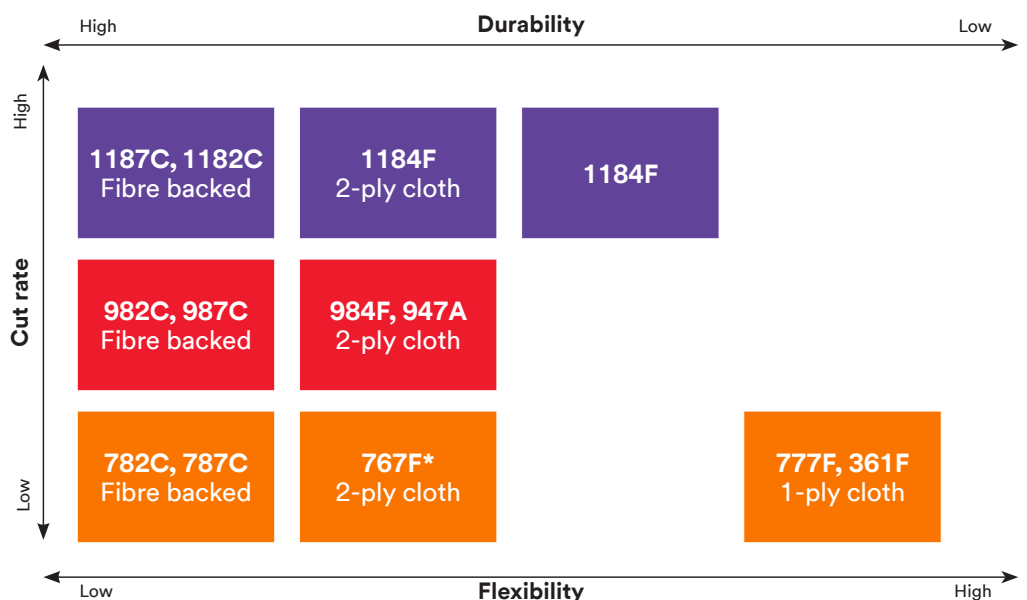

even for heavy-duty applications. Disc buttons are also colour-coded when needed to identify its grade, making it easy to select the grade required for different applications.

- ▶ Remote applications
- ▶ Retain extra control
- ▶ Localised, refining, finishing
- ▶ Corner or curved surfaces
- ▶ Intricate, difficult to reach areas
- ▶ Remove weld splatter on small areas

**Productivity  
Delivered**

## Grinding and stock removal

### 3M™ Cubitron™ 3 Roloc™ Durable Edge Disc 1184F

Stainless steel and other heat-sensitive alloys.

Designed for metalworking applications where flexibility is required and wear resistance in edge work is needed as well as weld grinding, beveling and deburring.

Grades 36+, 60+ and 80+

**NEW!**

### 3M™ Cubitron™ 3 Roloc™ Fibre Disc 1182C

Carbon steel grinding

Outstanding performance and productivity for medium to high pressure grinding applications on carbon steel when a smaller sized disc is needed.

Grades 36+, 60+ and 80+

**NEW!**

### 3M™ Cubitron™ 3 Roloc™ Fibre Disc 1187C

Stainless steel, cobalt chrome and nickel alloy applications.

Long-lasting disc offering a fast cut rate with high stock removal across a wide range of application pressures

Grades 36+, 60+ and 80+

**NEW!**

## Sustainability matters to 3M Abrasives.

When you buy from the SEAM value chain, you are helping to build a sustainable future for our industry, for people and for the planet.

3M is a founding member of the SEAM abrasives manufacturers program and aligns to the world's highest standards of quality, safety and performance in a sustainable environment. We commit to transparency, accountability, innovation and progress.

When buying from the SEAM value chain, customers are helping to build themselves a sustainable future.

Sustainable European Abrasive Manufacturers

**Product Selection and Use:** Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property. **Disclaimer:** 3M industrial and occupational products are intended, labeled, and packaged for sale to trained industrial and occupational customers for workplace use. Unless specifically stated otherwise on the applicable product packaging or literature, these products are not intended, labeled, or packaged for sale to or use by consumers (e.g., for home, personal, primary or secondary school, recreational/sporting, or other uses not described in the applicable product packaging or literature), and must be selected and used in compliance with applicable health and safety regulations and standards (e.g., U.S. OSHA, ANSI), as well as all product literature, user instructions, warnings, and other limitations, and the user must take any action required under any recall, field action or other product use notice. Misuse of 3M industrial and occupational products may result in injury, sickness, death, or property damage. For help with product selection and use, consult your on-site safety professional, industrial hygienist, or other subject matter expert. For additional product information, visit [www.3M.com](http://www.3M.com). **Warranty and Limited Remedy:** Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price. **Limitation of Liability:** Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
