3M™ Speedglas™ Welding Safety Catalogue 2017

Take control of your personal environment

 **Speedglas**™

One of the most important lessons we have learned over the last 35 years is that no two welders are the same.

How to find your customized welding helmet combination

We have compiled - into this one, easy-to-reference catalogue - much of the information you'll need to select specific welding safety products and/or entire welding PPE systems.

From the choices below, pick your key selecting factor and then go directly to that chapter. Or try our main [selection guide](#) on page 24.

Is welding filter performance your key selecting factor? Then start with [Your eyes](#) on page 6.

But if choosing a welding helmet is your most important criterion, see [Your eyes, face and head](#) on page 22.

Or if respiratory protection is your highest priority, go to [Your respiratory system](#) on page 44.

Too loud may be less loud than you think, check our solutions for [Your ears](#) on page 60.

Need body support solutions when welding at heights, see [Fall protection for welders](#) on page 66.

If you are looking for a specific product you can look it up in the [Parts Directory](#), on page 68.

Your responsibility – our solutions...

Typically, professional welders know about the hazards to their eyes and faces. But other hazards – like welding fumes – are sometimes not so well known.

It is the responsibility of the employer to identify any hazards in a work environment, and to provide the workers with adequate protection.

Hazards must be adequately explained. Then the choice of protective can be equipment made after joint consultations between employers and employees.

1. Identify the hazards

Make a list of all the risks in your welding environment (radiation, sparks, fumes, noise, trip hazards, falling objects, etc). 3M can help identify consultants and measurement tools.

2. Assess the risk levels

By evaluating every risk, you can prioritize their prevention. See more details in each section of this catalogue. If there are any doubts or ambiguities, always consult a professional safety engineer.

3. Select the right type of equipment

Determine your protection based on equipment type (e.g., eye, face, head, hearing), the level of protection needed to work in a specific application, and your users' preferences. Personal preferences - the key to user acceptance - covers issues including comfort, style, and ease of maintenance.

When all of these factors are included in the selection process, you're providing your workers not only the welding protection they need, but the ability to perform at their optimum level.

4. Training, motivation and maintenance

For maximum benefit from any piece of PPE, it pays to focus on user acceptance and proper use. 3M can help:

- On-site training by 3M personnel or a visit from our Welding Safety Caravan. We'll show you equipment options based on your needs.
- 3M eAcademy - the flexible way to discover and learn throughout your busy day: www.3m.com/3M/en_US/3m-academy/log-in
- Other techniques, such as Toolbox Talks, educational posters for your facilities, online videos, etc.

For more information please visit www.3M.co.uk/Speedglas or call our helpline on 0870 60 800 60 (UK), 1 800 320 500 (Ireland) [@3M_UK_Safety](https://twitter.com/3M_UK_Safety)

Contact information to 3M UK for reference in this catalogue, if located in other country please visit www.3M.com to find local contact information.

I do precise grinding

Check out our welding helmets with flip-up visors, they have a curved, clear protective visor underneath the welding filter: see page 31-33

I want to see around me

We recommend our welding helmets with side windows that widen your field of vision when welding: see page 26

I want to breathe fresh air

Our powered respirators are a favorite among many welders: see page 44

I need convenient head protection

Safety helmet solutions tailor-made for our welding shields: see pages 29 and 33

I need to weld with greater clarity

Truer colours and contrasts with 3M™ Speedglas™ Natural Colour Technology: see page 14

I like very lightweight welding helmets

Great! Try our most lightweight auto-darkening welding helmet: Speedglas SL, see page 36

Your eyes

How to beat the statistics	7

3M™ Speedglas™ Natural Colour Technology	14
3M™ Speedglas™ Auto-Darkening Filters	16
3M™ Eyewear - selection for welding helmet users	18

Each year in the US alone, more than \$300 million is spent on costs associated with workplace eye injuries, including medical expenses, workers' compensation, and lost production time.
Source: www.osha.gov/SLTC/eyefaceprotection (01.03.2017)

More than 90% of serious eye injuries at work can be prevented using appropriate protective eyewear.
Source: www.preventblindness.org/eye-safety-work (01.03.2017)

How to beat the statistics

Welding processes typically generate hazardous ultraviolet/infrared radiation and (intense) visible light that have the potential to cause permanent eye damage. Physical eye hazards include welding spatter and grinding particles.

Controlling exposure

A well-designed welding helmet and filter has a positive influence on the protection of your face and eyes from heat, spatter and radiation.

Put simply, auto-darkening welding filters allow welders to keep their welding helmet in place much more often than passive welding filters.

If you can see well, the motivation to constantly lift your shield is significantly reduced, meaning:

- You reduce the likelihood of exposure to harmful UV/IR radiation by accidentally striking an arc. Or being exposed to the arcs of nearby welders.
- You reduce the potential for foreign body eye injuries from grinding swarf or weld spatter.

Eye injuries account for one quarter of all welding injuries, making them by far the most common injury for welders, according to research from the Liberty Mutual Research Institute for Safety.

Improving upon what the welder sees

Your goal is to weld consistently great welds. Our goal is to provide you consistently clear, comfortable vision – with full-time eye and face protection.

“Because we make many of our own welding filter components, we can readily test and transfer new technologies,” says Kristina Magnusson, Senior Optics Specialist at the 3M Welding Centre of Excellence. “And, of course, we also have much better control over the entire manufacturing process.”

Kristina is one of the Centre’s four full-time optics specialists. Her responsibilities include liquid crystal cells, polarizers, and interference (UV/IR) filters. She also leads an international ISO task group of experts focused on eye and face protection standards for auto-darkening welding filters.

Like many of her co-workers at the Centre, Kristina is a long-time employee. “I had just got my master’s degree in engineering physics with a focus on optics when I was recruited to develop test instruments to measure the light diffusion of Speedglas welding filters. I’ve been here ever since.”

“Of course, safety is the prime consideration when it comes to welding PPE. But the 3M optics team aims to help welders even more by continuously improving the optical experience of our welding filters. “We’re constantly exploring new optical technologies that we can leverage to the welder’s advantage.”

UV/IR protection (the purple layer on the auto-darkening filter) is always in place and constantly providing protection from hazardous light radiation. And they consistently auto-switch from clear to dark, and back again, in just the way you want.

How auto-darkening filters work

Before:

With the helmet in the safe down position, you have a clear view through the welding filter. Both of your hands are free and the electrode can be precisely positioned.

During:

Within 0,1 milliseconds of the arc strike, the filter has switched to the dark state.

After:

The filter automatically returns to the clear state after welding is complete, allowing your immediate and safe inspection of the weld pool, as well as preparation for the next weld.

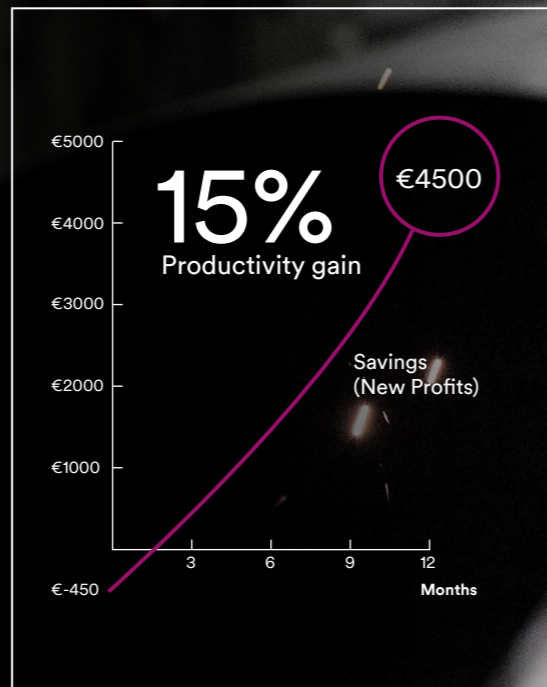

What other equipment pays for itself in two months?

Not only can you weld faster when you can see more clear, but your entire movement around your workpiece can become more efficient when you're not constantly having to raise and lower your shield.

We've studied welders and their increased efficiency when using our auto-darkening filters (ADFs) for almost four decades:

- The shorter the weld, the greater the productivity increase. Not surprising, applications requiring lots of tack welds have the most to gain.
- Where the final appearance of the weld is critical – for example, on high-value items – reduction in scrap alone (e.g., from bad starts) can quickly pay for our helmets.
- Since most welders do a combination of tack and longer welds, we use a conservative, generalized estimate of 15% gain in productivity.

So, for example, if you're paying a welder €20 per hour, a 15% improvement in productivity will pay for a €450 helmet in about two months and result in a year-end increase in savings (new profits) of €4500 when compared to continuing to use passive filters.

\$28,280

Average cost of injuries to the face, including disabling and non-disabling eye injuries.¹⁾

20,300

Lost work days in 2012¹⁾

Ask yourself

Are you doing everything possible to maximize the amount of time your welders have their shield in the safe, down position?

¹⁾ Source: US National Safety Council's Injury Facts, 2015

Your decision tree when selecting a welding filter

- 1 Would you benefit from seeing more natural colours and contrasts?**
The 3M™ Speedglas™ Auto-darkening Filters 9100XXi and 9002NC both allow you to more readily recognize colours. The light state is still shade 3, but the filter appears lighter, more detailed, and better able to view contours. More details on page 14–15.
- 2 Do you occasionally change shade numbers?**
If yes, you have plenty of models to pick from: all of our auto-darkening filters have variable (selectable) dark shades, as shown in the table on page 13.
- 3 What does your welding process require from your filter?**
This is a key decision factor. Using the table on page 13, pick a model that does well in the processes you use frequently.

You might want to also consider your needs for specific dark shade levels, light-to-dark switching sensitivity, and dark-to-light delay options which are features that vary from model to model.
- 4 How important is the size of welding filter's viewing area?**
For many welders, the ability to see more of their workpiece without moving their helmet or head is very important. For these “big picture” people, the 9100XX or 9100XXi models will be most appropriate.
- 5 Do you do a lot of tack welding?**
Then our tack welding comfort mode may be for you. The comfort mode setting may help reduce eye fatigue caused by your eye constantly adjusting to differing light levels during tack welding. It's available on 9100XX, 9100X and 9100V filters.

Recommended shade numbers according to EN 379:2003

Welding process	Current in amperes A																				
	1.5	6	10	15	30	40	60	70	100	125	150	175	200	225	250	300	350	400	450	500	600
MMA (covered electrodes)	8				9		10		11		12		13		14†						
MAG	8				9		10		11		12		13								
TIG	8		9		10		11		12		13										
MIG					9		10		11		12		13		14						
MIG with light alloys							10		11		12		13		14						
Air-arc gouging	10								11		12		13		14		15				
Plasma jet cutting							9		10		11		12		13						
Microplasma arc welding	4	5	6	7	8	9	10	11	12												
	1.5	6	10	15	30	40	60	70	100	125	150	175	200	225	250	300	350	400	450	500	600

The table recommends best dark shade of welding filter for various working applications. According to the conditions of use, the next greater or the next smaller scale number can be used.

1) The ratings (best - better - good - not recommended) above refer to the products listed in this chart and should be seen as general recommendations based on differences in product comfort features and configuration options when using these selected Speedglas welding helmet series.

2) When used with the front cover 9100XXi and the 3M™ Speedglas™ Welding Helmets 9100, 9100-QR or 9100-Air, see page 28.

Still seeing green?

Imagine what more realistic-looking colours and details could do for you:

- Provide better control of your weld puddle – with a view that appears lighter, brighter, and more realistic.
- Help you focus on your welding set-up, welding technique, and inspection of just-completed welds.
- Give you a clearer view of coloured welding machine controls – even with your helmet in the safe, down position.

See the difference!

Sample competitor filter in shade 3

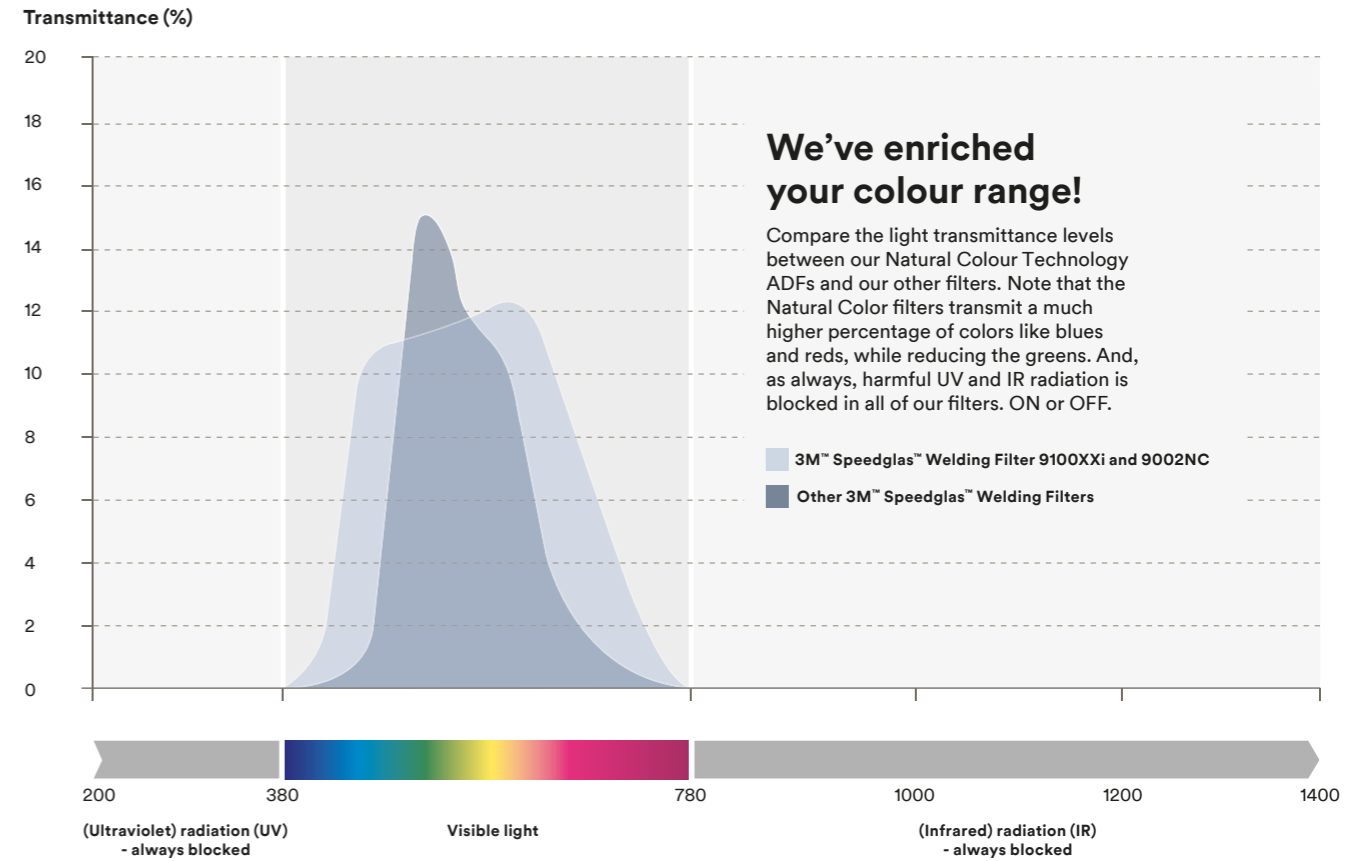

9100XXi and 9002NC filters in shade 3

“

The view seems lighter and less green – I can see colours far better! Even in the dark state, I see contours better.

Veteran Welder

Great clarity before, during and after welding when using the 3M™ Speedglas™ Welding Filters 9100XXi or 9002NC. Such clarity can be great for seeing the nuances of curved joints.

Your choice of auto-darkening filters (ADF)

The 3M™ Speedglas™ Welding Filter Series 9100 continues our tradition of outstanding optical quality, including uniform shading and minimal distortion across the entire filter viewing area.

By selecting just the right setting for each task, you can reduce eye strain and improve the quality of every weld.

Our top-of-the-line ADF

3M™ Speedglas™ Auto-Darkening Filter 9100XXi:

- See your welds in a new light, with more contrast and natural-looking colours.
- Grab and go welding with Auto-ON.
- 73×107 mm viewing area.
- Dark shades 5, 8, and 9 through 13.
- Delay settings allow the welder to extend the dark state for when the weld pool is still cooling.
- For all 3M™ Speedglas™ Welding Helmet Series 9100. See page 26-33.
- When used with the special 9100XXi Silver Front Panel and the Speedglas Welding Helmets 9100, 9100-Air and 9100-QR, you'll have access to the external control for both grinding and the memory modes. More details on page 29.

3M™ Speedglas™ Auto-Darkening Filter 9100XX

- 73×107 mm viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be locked-in.
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.
- For all 3M™ Speedglas™ Welding Helmet Series 9100. More information on page 26–33.

3M™ Speedglas™ Auto-Darkening Filter 9100X

- 54×107 mm viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be “locked-in.”
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.
- For all 3M™ Speedglas™ Welding Helmet Series 9100. More information on page 26–33.

3M™ Speedglas™ Auto-Darkening Filter 9100V

- 45×93 mm viewing area.
- Dark shades 5, 8, and 9 through 13.
- Any shade can be “locked-in.”
- The tack welding comfort mode may help reduce eye fatigue resulting from the eye constantly adjusting to differing light levels during tack welding. Using an intermediate light state (shade 5).
- The delay function allows the welder to set the recovery delay of the welding filter from dark to light according to welding method and current.
- For all 3M™ Speedglas™ Welding Helmet Series 9100. More information on page 26–33.

3M™ Speedglas™ Auto-Darkening Filter 9002NC

See your welds in a new light, with more contrast and natural-looking colours.

- 54×107 mm viewing area.
- Dark shades 8 through 12.
- For 3M™ Speedglas™ Welding Helmet series 9002NC compatible with the old 9000 series welding helmets, more information on page 34–35.

3M™ Speedglas™ Auto-Darkening Filter SL

Our most lightweight auto-darkening filter.

- 42×93 mm viewing area.
- Dark shades 8 through 12.
- For 3M™ Speedglas™ Welding Helmet SL, more information

3M™ Speedglas™ Auto-Darkening Filter 100V

- 44×93 mm viewing area.
- Dark shades 8 through 12.
- For 3M™ Speedglas™ Welding Helmet Series 100 (incl 100-QR), more information on page 38.

3M™ Auto-Darkening Filter 10V

- 44×93 mm viewing area.
- Dark shades 8–12.
- For 3M™ Welding Helmet 10V and 10QR, more information on page 39.

All our auto-darkening welding filters conform to European Standard EN 379 (Personal Eye-Protection – Automatic Welding Filters) as well as other national standards in USA, Canada and Australia – to name a few. Valid standard, optical classification and shade range are marked on the welding filter.

Compatibility

We try to ensure our eyewear is compatible with other 3M products, such as our helmets, respiratory or hearing protection.

Engineered for safety, designed for style

The portfolio of 3M™ Eye Protection promises quality eyewear that helps provide an optimal balance of comfort, protection and design.

Confident protection

All 3M protective eyewear are CE-marked and approved to EN 166:2001.

Do they really fit?

Making a measured evaluation of eyewear fit

Everyone's face and head are different – so how is one model of eyewear going to fit everybody? You know the problem. Ill-fitting safety glasses cause pressure and pain in some very vulnerable areas: your temples, your ears...even the bridge of your nose. Discomfort and lack of style are often major reasons for noncompliance.

To make a meaningful, measured determination of eyewear fit and security on each of your employees, we've developed a 6-step method¹⁾.

The 3M™ Eyewear Fit System uses coverage and gap gauge tools to assess four key elements of protective eyewear fit:

① **View**

Assessment to ensure the wearer can see in all directions of eye rotation without major obstruction to the field of view that would interfere with the ability to perform work tasks.

② **Coverage**

The coverage gauge assesses how well the safety eyewear covers the soft tissue area around the eyes.

③ **Security**

Assessment to ensure the eyewear stays in place on the wearer's head and does not fall off with head movement.

④ **Gaps**

The gap gauges help to identify excessive gaps between the eyewear and the face. Large gaps can provide a clear path for flying debris.

¹⁾ The full 6 step method is unique to 3M and is available free of charge (subject to terms and conditions, see website for details). Find out more by contacting your 3M Personal Safety Sales Representative or visit www.3M.co.uk/eyewear

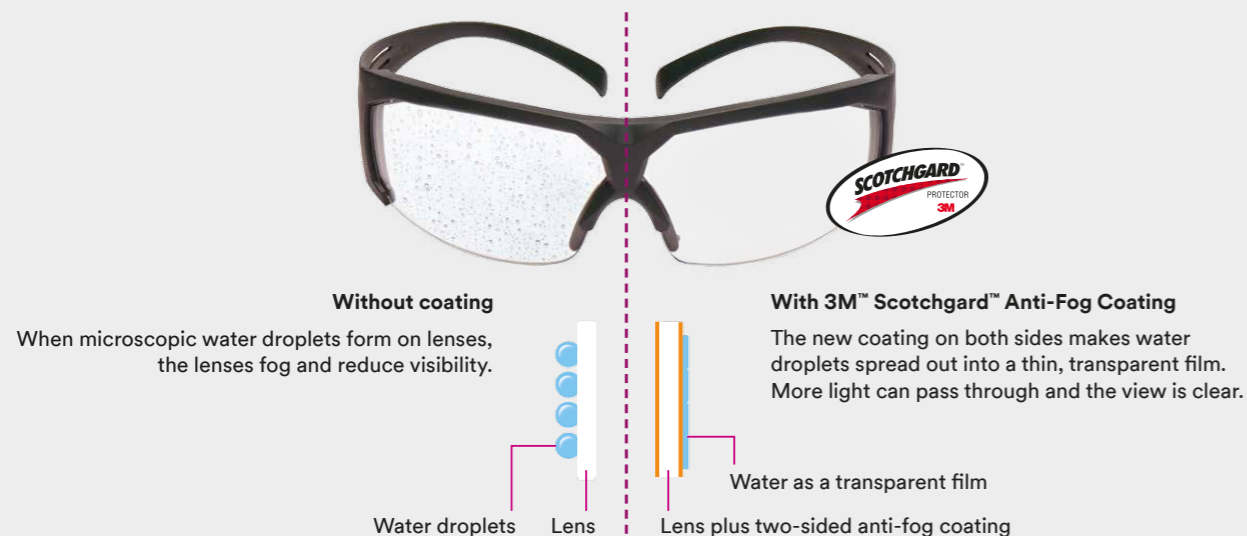

3M™ Solus™ 1000 Series Spectacles

A fogged lens can be frustrating and dangerous

Enjoy reliable, clearer sight longer with Scotchgard™ Anti-Fog Coating. Now available on 3M™ Solus™ 1000 Series safety eyewear in a range of lens colours: clear, grey or amber. All glasses come with polycarbonate lenses, which absorb 99.9% of UV rays.

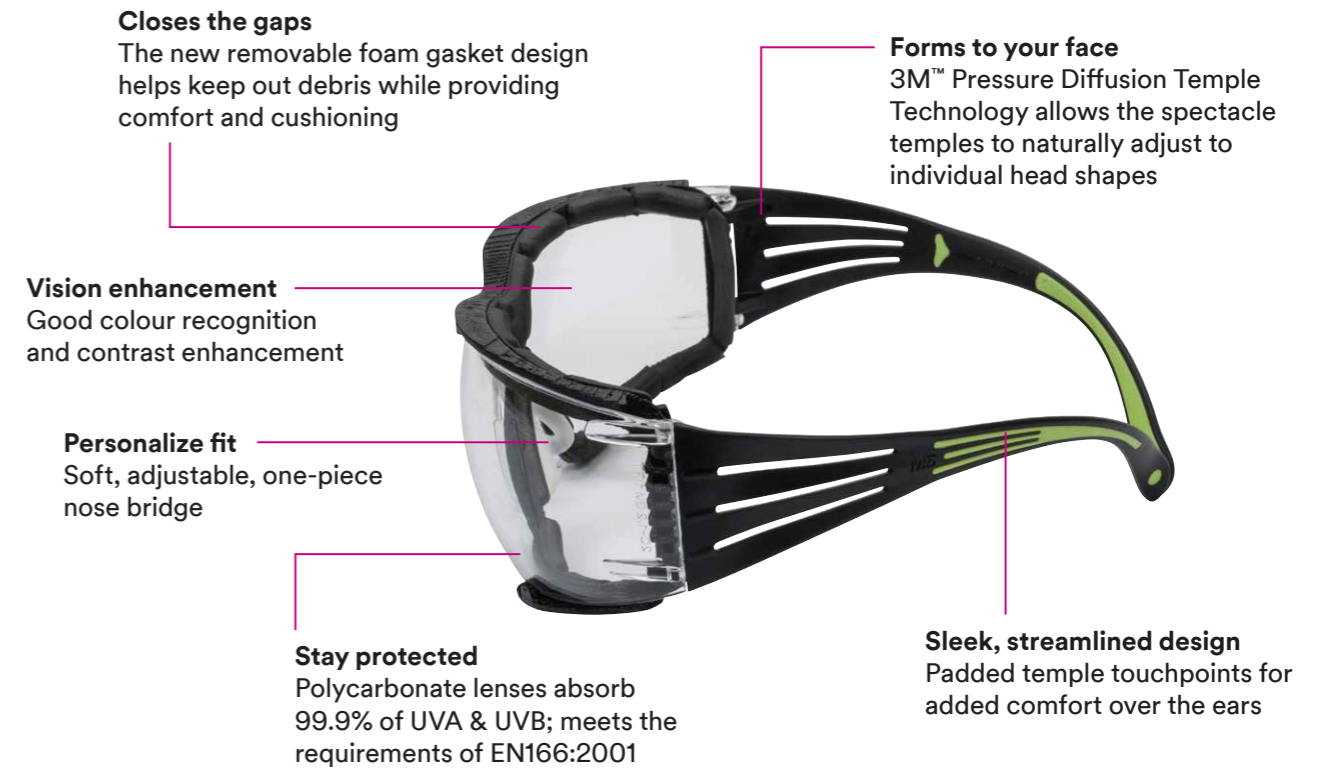

3M™ Scotchgard™ Anti-Fog Coating. Long-lasting clarity.

3M™ SecureFit™ 400 Series Spectacles

Takes comfort to a higher level

To better conform to each individual's unique head profile, we designed 3M™ SecureFit™ Protective Eyewear with Pressure Diffusion Temple Technology. This sleek and streamlined technology allows the temples to naturally form to your head's unique shape.

Your eyes, face and head

Content

Selector 2 - helmets sorted by welder's overall needs	24
Premium welding helmets with/without respirator or safety helmet (non-air): 3M™ Speedglas™ Welding Helmets 9100, 9100-Air and 9100-QR	26
Flip-up welding helmets with/without respirator: 3M™ Speedglas™ Welding Helmets 9100 FX, 9100 FX-Air	28
Multiple levels of protection (head, eye, face, respiratory, hearing): 3M™ Speedglas™ Welding Helmets 9100 MP and 9100 MP-Lite	30
A legend reborn with more natural colour : 3M™ Speedglas™ Welding Helmet 9002NC	32
When your priority is super light: 3M™ Speedglas™ Welding Helmet SL	34
Helmets in masterful graphic designs: 3M™ Speedglas™ Welding Helmet Series 100 and 100-QR	36
Basic performance in robust design: 3M™ Welding Helmets 10V and 10-QR	37
Selector 3 - refine your selection by helmet benefits	38
Selector 4 - helmets for powered and supplied air systems	40

There is no one perfect welding helmet

We have populated our helmet matrix with carefully considered design blends of protection, features, personal preferences, and performance to address the application needs of the vast majority of welders.

But for every helmet system we design, we have **four driving factors**:

Reliability

We know harsh welding environments: We build our products to thrive in them. From creating reliable arc sensing/shade switching to selecting highly durable materials to designing for long-lasting mechanical operation.

Comfort

Comfort means a helmet that vents stagnant air. It means a headband that avoids scientifically determined pressure points around your head. And how a helmet provides industrial grade eye and face protection while being comfortable for a full shift.

Protection

UV/IR radiation. High speed grinding particles. Falling objects. Lung disease. List your workplace hazards - then find the right Speedglas helmet, accessories, and respiratory protection. Have a unique workplace hazard? Contact your local distributor for even more 3M solutions.

View

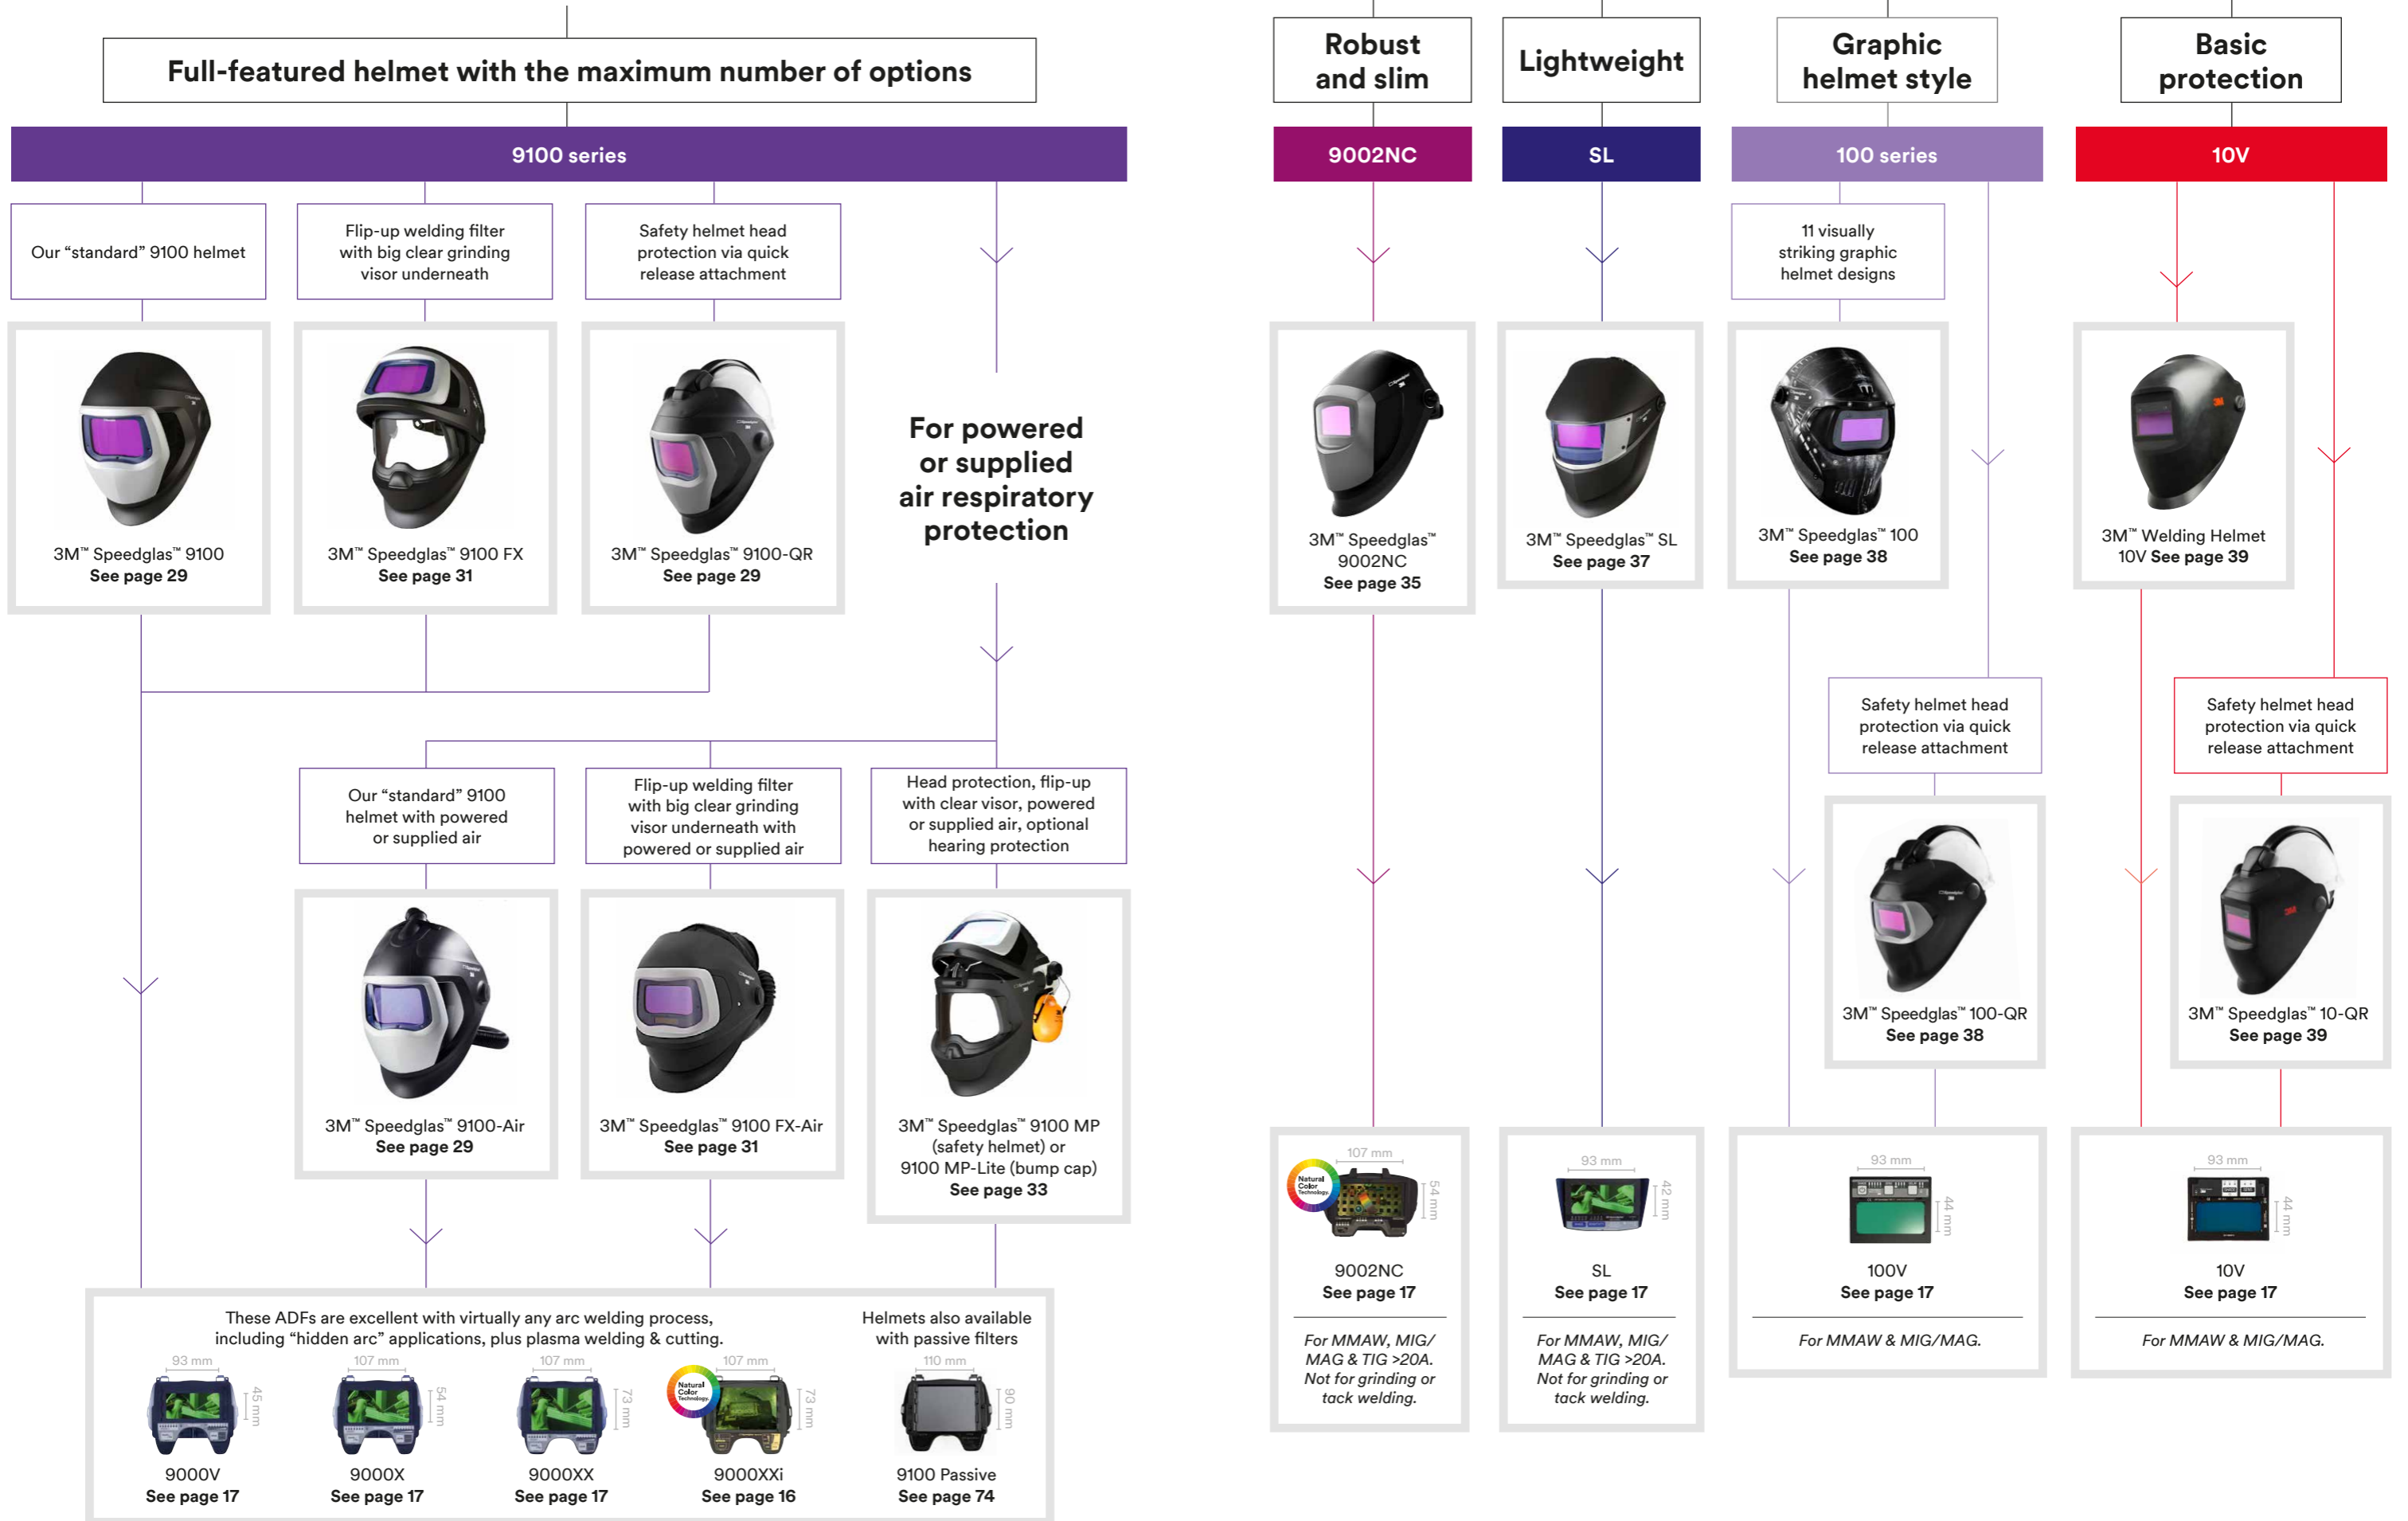

Every helmet design detail can affect your view. That's why we provide high-performance auto-darkening welding filters, our side windows lenses, and large, protective clear visors. Each of these, and many more, helmet design elements maximise your ability to see.

 Don't just take our word for it, experience our welding helmets yourself by signing up as a Speedglas test pilot at: goo.gl/vuEtb3 (connect using mobile device).

What do you need?

When you need coverage, control, and comfort:

3M™ Speedglas™ Welding Helmet Series 9100

High-performing people need high-performing products

The 3M™ Speedglas™ Welding Helmet Series 9100 includes six welding helmet models offering many options, including flip-up welding shields, safety

helmets, and respiratory systems. If you haven't experienced these innovations in welding protection, call your local 3M distributor for a hands-on demonstration.

Peripheral vision

The first time a welder puts on a Speedglas welding helmet with side windows you can see his startled reaction. Previously hidden peripheral hazards (beams, obstacles, other workers) are now easier to see through the two, shade 5 side filters.

Tailor to fit your personal preferences

With the 9100 headband, we've carefully avoided sensitive areas of the head while designing self-adjusting twin pads for the forehead band. By better contouring it around your head, our headband doesn't need to be overly tight to be comfortably secure.

Ergonomic fit

Adjust the shield's distance to your face. Fits head sizes 50 to 64 (S-M-L).

Stability

Ratchet for precise tightening.

Adapt to your position

Adjust the helmet tilt-angle while wearing the helmet on your head.

Less pressure

Self-adjusting "twin pads" contour to your head.

Low riding comfort

Adjust the helmet's parking position (left side) and friction (right side). Further details below.

We designed the 9100 helmet to "nest" down low, close to the headband, when raised. So you don't need to tighten the headband as much.

The helmet's smooth up-and-down pivot action can be locked in the up position – a light pull lowers the helmet back down again.

DROPS AS YOU LIKE

Drop-friction is adjusted on the wearers right hand side:

Turn the right-hand knob clockwise to increase (or counterclockwise to decrease) the effort needed to nod down the shield.

STABILITY WHEN RAISED

Helmet parking grip is adjusted on the wearers left hand side:

Turn the left-hand knob clockwise to increase (or counterclockwise to decrease) how tightly the shield is held in the raised "parked" position.

3M™ Speedglas™ Welding Helmets
9100, 9100-Air and 9100-QR

High-performance and comfort

2) Only in combination with 3M™ Speedglas™ Welding Filter 9100XXi.

9100

9100-Air

9100-QR

Protecting your eyes and face from radiation, heat and sparks – while providing a precise view of your work – makes your Speedglas welding helmet 9100 one of your most important welding tools.

All of these benefits can be used with powered or supplied air respiratory protection in combination with the Speedglas welding helmet 9100-Air.

If your work situation requires head protection, test out our Speedglas welding helmet 9100-QR. It quickly attaches to many of the industry's most popular safety helmets, including the 3M™ Safety Helmet H-701.

3M™ Speedglas™ Welding Helmets
9100, 9100-Air and 9100 QR

Simplify your workflow

The 9100XXi kit (special front and welding filter) houses external controls – enabling convenient, “gloves-on” memory mode switching – to help you weld, grind and see your finish.

Transform your safety helmet

As you attach and detach the 9100-QR helmet, you don't need to remove your safety helmet – so your head is protected at all times.

Extend your coverage

With our optional flame-retardant headcovers and ear/neck protectors.

Comfortable all shift long

Versatile protection and long-lasting comfort. The 9100 FX-Air helmet readily connects to either our powered or supplied air respirators.

Stay protected

TH3-rated respiratory protection: Low inward leakage means better breathing air quality.

Expand your view:

A quick lift of the front cover and you get a big, 17×10 cm, clear view – perfect for precision grinding, even in low light conditions.

More natural colours and contrasts

The Speedglas welding filter 9100XXi helps you see your welds in a new light, providing more contrast and natural-looking colours.

9100 FX

9100 FX-Air

Wider field of view with flip-up front – a combination welding helmet and protective visor.

A quick lift of the front and you get a big, 17×10 cm clear view – excellent for precision grinding in low-light conditions.

And if you use the 9100 FX-Air model, the clear view from the curved visor lets you keep your respiratory protection in place at all times.

Weld with confidence
Head, eye, face, hearing
and respiratory – we've
seamlessly integrated five
levels of welder protection
into one easy-to-use system.

See more of your work
A large (17×10 cm) curved
protection visor with excellent
views up, down, and side-to-side.

Extend coverage
All-new accessory shroud
covers front and back of neck
and shoulders, as well as upper
chest and back. See page 40.

9100 MP
with safety helmet

9100 MP-Lite
with bump cap

Have you tried multi-protection systems where some component seemed to clash with the other components?

That's why we built our 3M™ Speedglas™ Systems 9100 MP (multi-protection) just for welders. You can now work in a highly integrated, comfortable, protective envelope, with big, wide views as you weld, prep and grind.

Impact protection

9100MP

≈20% lighter

9100MP-Lite

Improved comfort

Head suspension features a smooth ratchet for easy tightening – even while wearing gloves!

Award-winning design

More than 20 years ago, the 3M™ Speedglas™ Welding Helmet 9000 set a new standard for rugged, dependable protection.

A helmet loved by many welders and internationally awarded for its ergonomic design.

Better control of the weld puddle

Improved optics in the 3M™ Speedglas™ Welding Filter 9002NC helps you see your welds in a new light, providing more contrast and natural-looking colour.

3M™ Speedglas™ Welding Helmet 9002NC

Light and narrow, for quick tasks

You asked and we listened. Many welders think our classic Speedglas helmet 9000 has the ideal blend of shape and balance.

So we've brought it back – upgraded for a totally new optical experience.

Freedom of movement

Shield width

Coverage

Pick your preference

The 9002NC helmet (left) is slimmer and not as deep as a 9100 helmet (right), making it more maneuverable and lighter in weight. On the other hand, the deeper and wider 9100 series covers more of your ears, neck, and sides of your head.

The slim profile offers increased freedom of movement in tight places.

3M™ Speedglas™ Welding Helmet SL

Forever super light, narrow and fast

i Light weight – only 370 gram (including auto-darkening welding filter)

Did you know that some lightweight welding helmets can actually absorb moisture and become heavier over time? We took care to avoid that problem by making our SL (super light) helmet from strong, non-absorbent materials (also applicable for the 9100 series helmets).

We also designed a special auto-darkening filter to make both the ADF and the helmet weight a mere 370 grams – 25% lighter than any other Speedglas model.

Easy tightening

The head suspension features a smooth ratchet for easy tightening – even while wearing gloves!

Light in weight, strong in performance

A slim and narrow helmet design, with an accompanying lightweight auto-darkening filter that's suitable for most arc welding processes.

Great for fast tasks

Designed specifically for quick welding tasks, a motion sensor automatically turns ON the welding filter when you pick up the helmet.

Designed for all-round MIG/MAG and MMAW (electrode or “stick”) welding, with user selectable dark shades of 10, 11 or 12.

Want to stand out?

Make an impactful statement with one of our powerful, distinctive graphic designs. Find them all on page 78.

Variable shades for flexibility

Five adjustable dark shades 8–12. A lockable shade 3 light state for grinding. And three sensitivity settings for customized light-to-dark switching, lock-in shade 3 light state.

Confident protection

Robust, industrial helmet design. Complies to the European Standards EN 175, EN 166 and EN 379.

Performance made affordable

Auto-darkening filter performance at a price that won't break the bank.

We got you covered

Every welder is different, and each day your tasks can change. As the owner of a 3M™ Speedglas™ Welding Helmet, you have a variety of accessories available to maximize your protection and comfort.

Plus, we now offer a new generation of additional coverage products made in flame-retardant textiles for protection against molten metal, sparks and flames.

Quick guide to extend your protection

Time to upgrade your visibility?

Getting too close to your arc?

Start with the easiest solution first: replace your filter's outer protection plates more frequently!

If you still can't see the detail you need, try one of our magnifying lenses. They come in x1.0, x2.0 and x3.0 strengths. For details, see the Accessories and Spare Parts section for each helmet.

Need an even darker shade?

Welding at very high amperages can create such an intense weld pool that you may feel eye strain, even when using a dark shade selection. On the welding filter series 9100, 9000 and 100, you can replace the standard (clear) inner protection plate with either our +1 or +2 shade plates. For details, see page 69.

System	Component	Typically replaced	Notes
Welding filters	Outer protection plate	Once a week	Replace anytime the plate becomes deeply pitted, scratched or too dirty to clean with soft cloth or lens paper
Welding filters	Inner cover plate	Once a month	Regularly clean with a soft cloth and replace if any pits or scratches occur.
Welding helmets	Visor plate	Every two weeks	Replace more often if visibility is reduced.
Welding helmets	Sweatband	Once a month	Replace more often if sweatband becomes unhygienic.
Welding helmets with respirator	Face seal	At least every 2 months	Replace earlier in really dirty environments or whenever the seal becomes unhygienic.
Welding helmets with respirator	Breathing tube	If damaged, deformed or leaking any air	To extend the life of breathing tube, use a tube cover or a heavy-duty rubber breathing tube.

Important information. Note that higher-than-normal levels of pollutants, heat, and sparks will require more frequent replacements of components. Chart assumes minimum 4 hours usage per day. Ordering information for each series of welding helmet can be found in the Parts Directory, page 68.

What's happening to my welders?

What do increased clumsiness, ulcers, and flu symptoms have in common? They - and many more symptoms - might be caused by overexposure to welding fumes.

Potential immediate health effects of certain welding fumes

- Eye, nose and throat irritation
- Dizziness
- Nausea
- Headaches
- Metal fume fever. Notably, it is more likely to occur after time away from the job (weekends, holidays, etc.)¹⁾

Potential long-term health effects of certain welding fumes

- Lung function abnormalities, including bronchial asthma, chronic obstructive pulmonary disease (COPD), pneumoconiosis and other pulmonary fibrosis (chronic beryllium disease, cobalt lung), and lung cancer.²⁾
- Larynx and urinary tract cancers.³⁾
- Certain fumes can lead to stomach ulcers, kidney damage, and nervous system damage.³⁾

When good enough isn't enough

Occupational Exposure Limits (OEL) are typically country specific. It's legally within many country regulations to inhale 11 grams of zinc oxide every year. How?

11 gram of welding particles

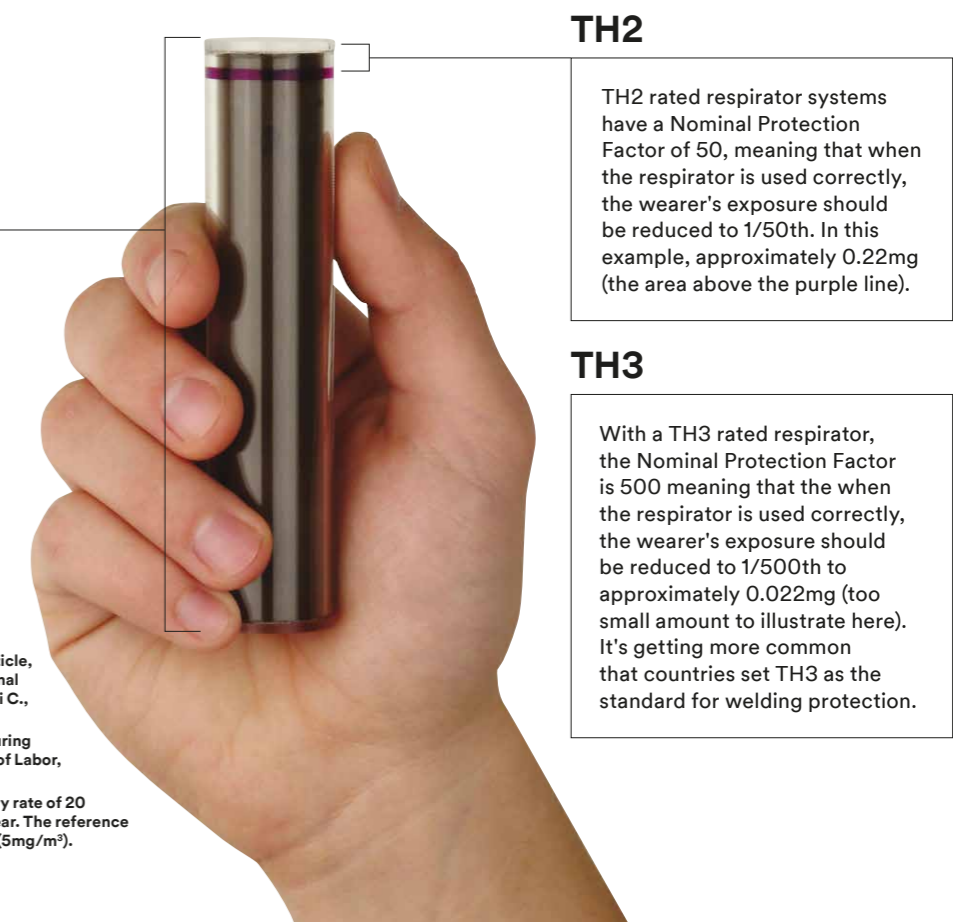

To illustrate a general example: working with an OEL of 5 mg/m³ for zinc oxide, a full-time welder may inhale up to 11 grams of zinc every year.⁴⁾

1) "Prevalence and association of welding related systemic and respiratory symptoms in welders," Occupational & Environmental Medicine, El-Zein M., Malo J-L., Infante-Rivard C., Gautrin D., 2003;60:655-661.

2) "Welding-Related Respiratory Diseases" article, (translated from) Medycyna Pracy (Occupational Medicine), Wittczak T., Walusiak J., Pańczyński C., 2009;60(3):201-8.

3) "Controlling Hazardous Fumes and Gases during Welding," OSHA Fact Sheet, U.S. Department of Labor, DSG FS-3647, March, 2013.

4) The example is based on a typical respiratory rate of 20 litres of air per minute or 2300 m³ of air per year. The reference used here is the OEL of zinc for Sweden, 2015 (5mg/m³).

TH2

TH2 rated respirator systems have a Nominal Protection Factor of 50, meaning that when the respirator is used correctly, the wearer's exposure should be reduced to 1/50th. In this example, approximately 0.22mg (the area above the purple line).

TH3

With a TH3 rated respirator, the Nominal Protection Factor is 500 meaning that the when the respirator is used correctly, the wearer's exposure should be reduced to 1/500th to approximately 0.022mg (too small amount to illustrate here). It's getting more common that countries set TH3 as the standard for welding protection.

Reducing welding fumes & exposure

Welding creates a mixture of respirable gases and/or fumes (particles). To address these hazards and risks, it is best practise to use a hierarchy of controls. The idea is that the highest priority items on the hierarchy not

only do the most to reduce fumes and worker exposure, but that they also put the least burden of responsibility on the welder. However, every welding fume control has its limitations:

1

Modify or substitute your welding process to other processes that generate less fumes and/or eliminate the most toxic contaminants.

Control Limitations: Substitutions may not be possible. For example, when the end-product requires stainless steel (chromium).

2

Engineering controls include modifying enclosures around the welder, or the general ventilation of the workshop, or local exhaust controls.

Control Limitations: Ventilation can be difficult to achieve due to conflicting needs, for instance heating/cooling or shielding gases.

3

Work practices include having the welder keep their head out of the plume.

Control Limitations: Space-restricted workpieces or the welding situation may not allow alternative placement of the welder's head.

4

Personal respiratory equipment. As an addition to steps 1 through 3 we recommend personal respiratory protection for the welder to achieve the best protection and comfort.

Control Limitations: Companies should establish a respiratory protection program that includes selection of respirators and their filters, training and maintenance.

FACTS:

Inadequate respiratory protection is the 4th most frequently cited workplace violation.¹⁾

40–50 welders

in UK are hospitalised every year with pneumonia caused by welding fume. Two of these welders die every year.²⁾

1) Top 10 Most Frequently Cited Standards, OSHA, U.S. Department of Labor, for 2015.

2) Source: www.hse.gov.uk/welding/illness.htm (02.03.2017)

An overview of metals, welding processes, and respirator selection

The following is a general outline to the type of 3M™ Respiratory Protection that may be appropriate for your welding applications.

The overview looks at the metals to be joined, welding processes, and ventilation conditions. It then lists the types of respiratory protection that your Industrial Hygienist may recommend as determined by their hazard assessments.

- P** = Particle filtration via disposable respirator, reusable respirator, or powered air respirator with a high efficiency particulate filter (P) installed.
- P** + **A B E** = Particle and gas filtration via powered air respirator with both a high efficiency particulate filter (P) and a A1B1E1 (or A2) filter installed.
- S** = Supplied air via regulator and filtration unit.

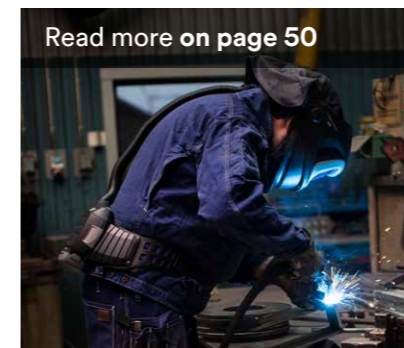

Material to be welded	Welding method	Ventilation conditions of your working environment			
		Good environment, with forced ventilation	Limited ventilation	Restricted space	Classified as IDLH
Aluminium	MIG	P	P / P + A B E	S	Powered and supplied air respirators must never be used in atmospheres Immediately Dangerous to Life or Health (IDLH). Always consult your Safety Engineer.
	TIG	P	P / P + A B E	S	
	MMA (stick)	P	P / P + A B E	S	
Stainless steel	MIG	P	P / P + A B E	S	
	TIG	P	P / P + A B E	S	
	MMA (stick)	P	P / P + A B E	S	
	PLASMA (Welding and Cutting)	P	P + A B E / S	S	
Steel not coated or painted	MIG/MAG	P	P	S

	PLASMA (Welding and Cutting)	P	P / S	S	
Steel painted (lead based paints)	MIG/MAG	P	P	S	
	MMA (stick)	P	P	S	
	PLASMA (Welding and Cutting)	P	P / S	S	
Steel galvanised	MIG/MAG	P	P	S	
	MMA (stick)	P	P	S	
	PLASMA (Welding and Cutting)	P	P / S	S	
Steel coated with 2-component paints or insulated with 2-part polyurethanes (risk of isocyanates)	MIG/MAG	S	S	S	
	MMA (stick)	S	S	S	
	PLASMA (Welding and Cutting)	S	S	S	
Material cleaned with trichloroethylene	MIG	S	S	S	
	TIG	S	S	S	
	MMA (stick)	S	S	S	
	PLASMA (Welding and Cutting)	S	S	S	

3M accepts no liability for the incorrect choice of respiratory protective equipment. This chart is only an outline. It is designed to help focus on the most appropriate respirators in the 3M range for particular applications. It should not be used as the only means of selecting a respirator. Details regarding performance and limitations are set out on the respirator packaging and user instructions.

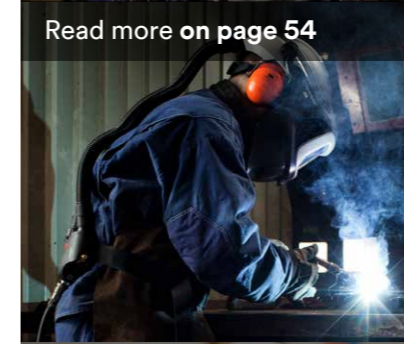

Which style of respirator suits your needs?

The following is an overview of the four general types of 3M respiratory protection found in this catalogue. In addition to your application's specific filtration requirements, your selection

process may include factors such as equipment style/configuration, personal preference/comfort, and maintenance considerations.

Read more on page 58

3M™ Adflo™ Powered Air Respirator

- NPF¹⁾ of up to 500 (TH3).
- Can be used specifically for high efficient particle filtration (only) or for the filtration of both particulates and gases, depending on filter selection.
- Cannot be used to protect against substances with poor warning properties (taste/smell).
- Four welding helmet and three protective visor configurations to pick from.
- Provides a constant nominal airflow rate of either 170 lpm or 200 lpm (based on user settings).
- The respirator's slim turbo design allows highly mobile use.

3M™ Versaflo™ Supplied Air Regulators

- NPF of 200 (3B).
- Can be used to protect against substances with poor warning properties (taste/smell).
- Four welding helmet and three protective visor configurations to pick from.
- Belt-mounted regulator with user control over airflow: from 170 lpm to 305 lpm.
- Requires compressed air, an air filtration unit, and appropriate air supply lines.

3M™ Reusable Respirators

- NPFs of either 10 or 50, depending on model.
- All provide protection against solid and liquid particles.
- Specific products for organic vapour/inorganic vapours + acid gas/ammonia.
- Fits under all 3M™ Speedglas™ Welding Helmet Series 9100.
- Maintenance-free or reusable models available.

3M™ Disposable Welding Respirators

- NPF of 10.
- For moderate levels of fine dust particles; oil- and water-based mists; metal fume; and ozone (10 x OEL).²⁾
- Lightweight.
- No maintenance – disposable.
- Fits under virtually any welding helmet.

1) NPF = Nominal Protection Factor. The nominal protection factor based on laboratory-measured performance data according to European Standards. The protection factor is assigned by local authorities in each European country and can therefore be different for each country.
2) OEL = Occupational Exposure Limit

Better for backs

The ergonomic leather belt, shaped for maximum freedom, is extra wide around the turbo unit for additional back support.

A system for your needs

System components are designed to work securely together, combining head, eye, face and respiratory protection.

Move around

The slim profile and ergonomic turbo design makes it easier to go into tight spaces. The robust 3M™ Adflo™ Powered Air Respirator provides all of the features you would expect in a premium system, including easy-to-use functionality.

Go higher

At higher altitudes, air is less dense. To compensate, we offer the 3M™ Adflo™ High Altitude Powered Air Respirator.

 Suitable for 0 to 3000 meters above sea level, or 0 to 1500 meters with gas filters.

3M™ Adflo™ Powered Air Respirator

**Your own filtered atmosphere...
...mobile and adaptable**

Is there a way to both increase your respiratory protection against harmful welding fumes while increasing the comfort around your face and head? Tackle workplace hazards with a respiratory protection solution workers will want to wear.

As one of the most popular respirators of its kind in the world, the 3M™ Adflo™ Powered Air Respirator is designed to provide welders a constant nominal airflow rate of 170 litres per minute, regardless of the battery's charge or the particle loading of the filter.

Green for go

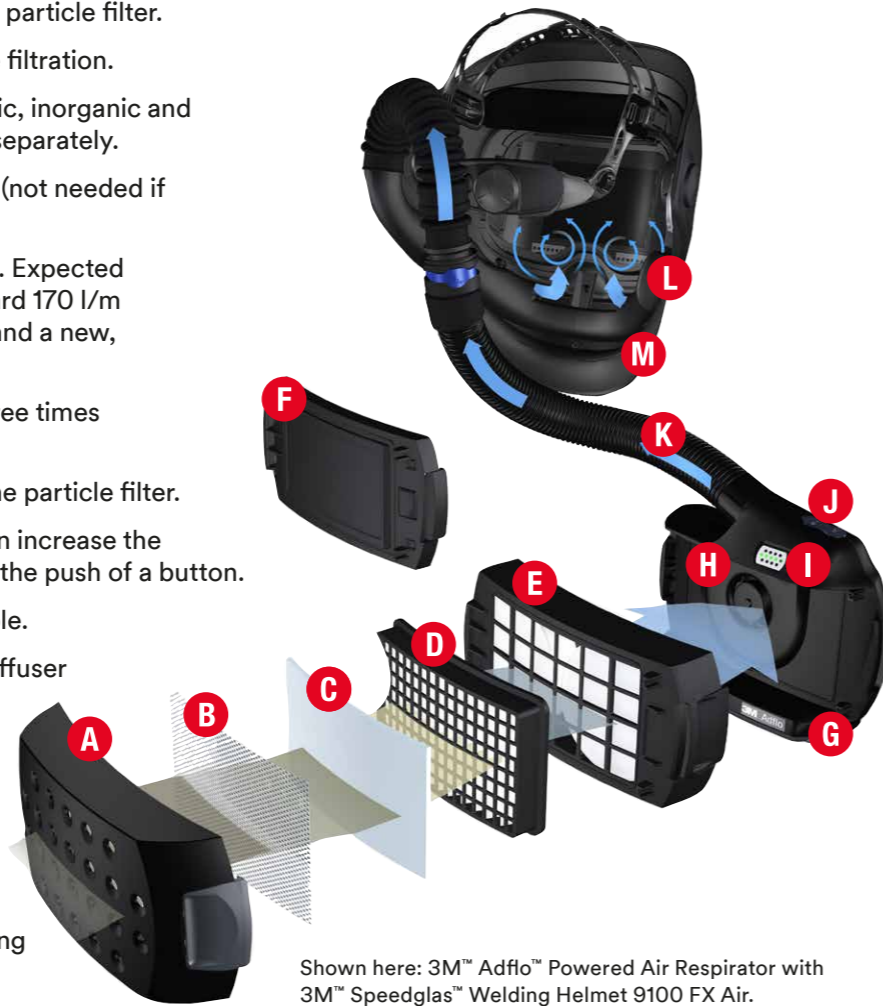

As soon as you turn on your Adflo powered air respirator, a display indicates the status of the filter. Green light means that the unit is working normally. Red light indicates that the filter is clogging up.

<p>1. Particle filter is new</p> 	<p>2. Three green indicator lights come on as the filter begins to clog</p> 	<p>3. Three green and one red light: expect a shorter battery runtime. Particle filter replacement is recommended.</p> 	<p>4. Three green and two red lights: the particle filter is clogged and must be replaced.</p> 
--	---	--	--

An adaptable system that saves money

With the right type of filter, the Adflo respirator helps effectively protect you against both particles and gases – all in one system. And you can selectively replace either the particle or the gas filter as needed: you don't need to change both filters at the same time.

- A Filter cover:** holds the different available Adflo filters.
- B Spark arrestor.**
- C Prefilter:** increases the service life of the particle filter.
- D Particle filter:** high efficiency particulate filtration.
- E Gas filter:** (A1B1E1 or A2) captures organic, inorganic and acid gases and vapours. Gas filters sold separately.
- F Odour filter:** removes unpleasant smells (not needed if a gas filter is installed); sold separately.
- G Li-ion battery:** fully charges in 4,5 hours. Expected operating time is 7–9 hours at the standard 170 l/m airflow setting with a new particle filter and a new, fully-charged battery.
- H Brushless motor:** with an average life three times longer than conventional motors.
- I Filter indicator:** indicates the status of the particle filter.
- J Airflow plus:** for hot, humid jobs, you can increase the airflow from 170 l/min to 200 l/min with the push of a button.
- K Breathing tube:** different options available.
- L Airflow:** for your maximum comfort, a diffuser evenly distributes filtered air throughout the entire breathing zone of the helmet. Plus, the intelligent turbo unit keeps the airflow rate at a constant, preset level.
- M Soft, flexible face seal (removed here for clarity):** creates a positive pressure environment within the helmet, keeping the surrounding pollutants at bay.

Shown here: 3M™ Adflo™ Powered Air Respirator with 3M™ Speedglas™ Welding Helmet 9100 FX Air.

Increase your comfort

There are two specific accessories for the Adflo respirator we want to highlight, to maximize your comfort:

Braces (835020), to be combined with the leather belt and a backpack (BPK-01) for additional back support, when using the Adflo respirator.

For maximum safety and performance, make it a regular habit to check and change the following items at the intervals recommended below.

Adflo component	Typically replaced ¹⁾	Notes
Prefilter	Once a week	Regular replacement of the prefilter extends the life of the particle filter, saving money while also increasing the battery run-time.
Particle filter	At least every month	Replace when particle filter indicator becomes red. Otherwise, replace whenever the battery operating time becomes too short, or when the low airflow alarm is triggered by a fully loaded filter.
Gas filter	According to regulations at your work place	Smell and taste is not recommended as a measure of change.
Odour filter	Any time you smell unpleasant odours	Note: odour filter is not required if a gas filter is used.
Spark arrestor	As needed	Replace if deformed and no longer fitting well.

¹⁾ Important information. Note that higher-than-normal levels of pollutants, heat, and sparks will require more frequent replacement of components. Chart assumes minimum 4 hours usage per day. Ordering information for each series of welding helmet can be found in the Parts Directory page 84.

High quality air

The airline supply must be air of breathable quality meeting the requirements of EN 12021. On page 86 you will find air cleaning stations from 3M.

Stay aware

If your air supply would ever fall below 170 lpm, the regulator's warning whistle will sound.

Many helmet options

Achieve a Nominal Protection Factor of 200 when you combine the 3M™ Versaflo™ Belt Mounted Regulators with our 3M™ Speedglas™ Welding Helmets 9100-Air, 9100 FX-Air, 9100 MP or 9100 MP-Lite.

3M™ Versaflo™ Supplied Air Regulators**Light on your belt and soft on your ears**

V-100E Air Cooling

V-200E Air Heating

V-500E Flow Controlled

The balanced, belt-worn, V-500E regulator consistently delivers the airflow level you set (170-305 l/min). An integrated silencer keeps the noise level equivalent to a typical conversation.

There are two alternative regulators to either cool (V-100E) or heat (V-200E) the airflow by as much as 28°C. These regulators are excellent choices for workers exposed to uncomfortable temperature ranges.

**Soft on your face,
easy on your lungs**
Soft facepieces and face seals,
along with excellent exhalation
valves.

3M™ Reusable Respirators

An easy choice for a tough world

Get your customized combination of respiratory protection and personal comfort preferences. Our half mask respirators are extremely popular throughout industry. The filters/respirators featured here can be appropriate for numerous welding applications, while being compatible with most 3M™ Speedglas™ Welding Helmets.¹⁾

3M™ Half Masks Series 4000

- Maintenance-free: save time with pre-installed filters.
- Less heat and moisture build-up due to the central exhalation valve.
- Reuse multiple times until damaged, clogged with particulates, or saturated with gas.

3M™ Half Mask Series 6500QL

- Our lightest silicone facepiece keeps its shape, even in high-heat environments.
- Low-profile, wide field-of-view design.
- Easy on and off with our convenient Quick Latch (QL) Drop-Down Mechanism.
- Easier breathing with 3M™ CoolFlow™ Exhalation Valve.

3M™ Half Mask Series 7500

- Soft silicone face piece material for great comfort and durability.
- Easier breathing with 3M™ CoolFlow™ Exhalation Valve.
- Convenient Drop-Down Mechanism.

3M™ Reusable Respirators	Performance level	Approval
Half masks 6500QL or 7500 with Filter 2128	10 x OEL ³⁾ for Ozone 12 x OEL ³⁾ for solid and liquid particles (P2 R) Plus relief from nuisance level acid gas/organic vapours.	EN140:1998 (masks) EN143:2000 + A1:2006
Half masks 6500QL or 7500 with Filter 2138	10 x OEL ³⁾ for Ozone 50 x OEL ³⁾ for solid and liquid particles (P3 R) Plus relief from nuisance level acid gas/organic vapours.	EN140:1998 (masks) EN143:2000 + A1:2006
Half mask 4255	10 x OEL ³⁾ for organic vapour ⁴⁾ 50 x OEL ³⁾ for particles	EN405:2001 + A1:2009 FFA2P3 R D
Half mask 4277	10 x OEL ³⁾ organic vapours ⁴⁾ , inorganic vapours and acid gases 50 x OEL ³⁾ for particles	EN405:2001 + A1:2009 EN405:2001 + A1:2009 FFABE1P3 R D

¹⁾ Since everyone's head size and shape is different, we recommend that you work with your 3M™ distributor to find the respirator models that are most compatible with your welding helmet(s). The filter option reference is for particle filtration. The 3M™ Half masks can be combined with many other types of filters for both gases and vapours. Please visit www.3M.com to find other options.

³⁾ OEL = Occupational Exposure Limit - please use local exposure limit.

⁴⁾ Organic vapours boiling point >65 degrees C

Secure fit
Shape it to your individual nose size and facial profile with the bendable metal nose clip.

Breathe easier
3M™ Advanced Electret Filter Material combines effective filtration with low resistance.

Filter out metal fumes
Welding and metal pouring respirators all feature the proprietary 3M™ CoolFlow™ Exhalation Valve.

3M™ Welding Fume Disposable Respirators

Light, convenient and comfortable protection

Looking for lightweight, effective, comfortable and hygienic respiratory protection against dusts, mists, and metal fumes?

Especially designed for welders, the 3M™ Disposable Respirators 9925 and 9928 include a flame-retardant, anti-clog outer surface that resists blockage even after extended use against welding fumes.

3M™ Particulate Filters	Model	Approval	Substance
	9925 – Without face seal, non-reusable.	EN149:2001 + A1:2009 FFP2 NR D	Organic vapours, ozone, particles / 10 x OEL ²⁾ . Nuisance level odours below OEL ²⁾ .
	9928 – With soft, PVC inner face seal. Improves comfort and can be hygienically cleaned (can be used for more than one shift).	EN149:2001 + A1:2009 FFP2 R D	Organic vapours, ozone, particles / 10 x OEL ²⁾ . Nuisance level odours below OEL ²⁾ .

2) OEL = Occupational Exposure Limit - please use local exposure limit.

Strategies for moving towards 100% usage	62
3M™ PELTOR™ Level Dependent Earplug LEP-100 EU	63
Earmuffs that attach to safety helmets	64
Selector 5 - hearing protection for welders (earmuffs & ear plugs)	65

The challenge of hearing protection for welders

Gives the expected protection.

Significantly reduces protection.

Virtually no protection.

Five minutes of carelessness per day significantly reduces the effect of the protection

That's right: if you're in a harmfully loud workplace – at or above 85 decibels – then not having your ear protection in place just 10% of the time offers you virtually no protection. Noise-induced hearing loss (NIHL) is caused by the damage and eventual death of the ear's hair cells. Unlike some other cells, human ear hair cells never grow back.¹⁾

Too loud may be less loud than you think

Think of all of the noises that surround you at your welding shop. Your tools, of course. But also the sudden, short, yet very loud noises: metal falling onto metal or hammers banging metal into place. Those sudden noisy spikes, at or above 85 decibels, could be damaging your hearing unless your hearing protection is always in place.

¹⁾ <https://www.nidcd.nih.gov/health/noise-induced-hearing-loss>

Moving towards 100% usage

Measure the noise

Determine where your facility falls on the regulations' scale of Exposure Action Values (see table below) by having a professionally designed audiometric testing assessment.

Create a Hearing Conservation Programme

Between the lower and upper Exposure Action Values, it is required to:

1. Provide information on potential hearing loss risks.
2. Provide the appropriate hearing protection devices.
3. Provide training.

Select hearing protection that your workers want to wear

This is the most important step in moving towards 100% usage. The following pages offer Hearing Protection Equipment (HPE) options for virtually every welder's needs and preferences.

Exposure Action Values	
87dB (A) 140dB (C) Peak LEX, 8h	Limit Value Cannot be exceeded at any time. Can be achieved with HPE.
85dB (A) 137dB (C) Peak LEX, 8h	Upper Exposure Action Value HPE must be used and a Hearing Conservation Programme initiated.
80dB (A) 135dB (C) Peak LEX, 8h	Lower Exposure Action Value HPE must be made available on request.

Despite industry regulations, 40 million workers are exposed to loud noise and 13 million suffer from hearing disorders.¹⁾

¹⁾ European Agency for Safety and Health at Work 2016

3M™ PELTOR™ Level Dependent Ear Plug LEP-100 EU

Stay aware and communicate

How can you protect your hearing but still communicate in workplaces with loud noises? The 3M™ PELTOR™ LEP-100 EU amplifies weak sounds (like voices) while attenuating loud noises – even sudden loud noises.

Added convenience

Replaceable eartips are available in small, medium, and large sizes and two different designs to accommodate most user's ear canals:

- UltraFit™ Eartips, SNR of 32 dB
- Torque Eartips, SNR of 38 dB.

Rain or wind

Water resistant microphone port also helps minimise wind noise.

Easy operation

Intuitive one-button operation turns the unit on and off, and selects volume settings.

Long usage time

The rechargeable Li-ion battery provides up to 16 hours of continuous operation.

Improve situational awareness and communications with noise level dependent ear plugs.

3M™ PELTOR™ Earmuffs X-Series

No compromises
Ear cups have a streamlined design that doesn't compromise noise attenuation.

Helmet mounted
Integrated design for more robustness

Comfortable
Lightweight dual mould cups to help minimise heat and moisture build-up

Stylish and reliable
New ear cushion foam technology for an effective acoustic seal and reliable protection

Specifications and ordering info: page 65.

3M™ PELTOR™ Welding Earmuffs H505B

Good fit
Fit nicely under 3M™ Speedglas™ 9100 Series and other welding helmets

Less scratch sound
Semi-soft cup surface helps minimize scratch sound transmission

Reliable noise reduction
Soft ear cushions provide a comfortable seal and help reduce loud noise exposure

Stays in place
Two-point suspension and wire headband for a secure, comfortable fit

Specifications and ordering info: page 65.

Protecta® Pro™ Welders Harness

Fall protection harness for high heat environments

Pro™ Welders Harness

For hot work use

Fire and sparks are a major concern in jobs such as welding, cutting and other high temperature applications. Keeping safe requires special materials to resist these hazards.

The Protecta® Pro™ Welders Harness is specifically designed to resist the potential heat damage experienced in welding applications. Featuring highly durable heat resistant and flame retardant modacrylic over Kevlar® webbing and a lightweight design providing excellent body support solutions for welding at height.

3M™ Speedglas™ Welding Helmet 9100 FX

Helmets with side windows – and auto-darkening filter

Part No	Description
54 18 15	With Speedglas welding filter 9100X (54×107 mm).
54 18 25	With Speedglas welding filter 9100XX (73×107 mm).
54 18 26	With Speedglas welding with filter 9100XXi (73×107 mm).

Helmet without welding filter

Part No	Description
54 18 00	Welding helmet 9100 FX with side windows, headband and front cover.

Alternative 3M™ Speedglas™ Welding Filters

Part No	Description
50 00 01	Passive filter kit 9100 shade 11 (90×110 mm).
50 00 05	Auto-darkening filter 9100V, variable shade 5, 8, 9–13 (45×93 mm).
50 00 15	Auto-darkening filter 9100X, variable shade 5, 8, 9–13 (54×107 mm).
50 00 25	Auto-darkening filter 9100XX, variable shade 5, 8, 9–13 (73×107 mm).
50 00 26	Auto-darkening filter 9100XXi variable shade 5, 8, 9–13 (73×107 mm).

Passive filters combined in flip-up helmets

With the 3M™ Speedglas™ Flip-up Welding Helmets, the side windows offer additional peripheral welding vision. Now also compatible with passive welding filters appropriate for long, continuous welds and less sensitive to humidity and heat.

Excellent low-cost options for large, 110 × 90 mm welding viewing area. And you can easily upgrade to a high performance Speedglas auto-darkening filter at any time.

Welding helmets – with 3M™ Safety Helmet H-701

Part No	Description
58 36 15	With Speedglas welding filter 9100X, with rail and safety helmet (54×107 mm).
58 36 25	With Speedglas welding filter 9100XX (73×107 mm).
58 36 26	With Speedglas welding filter kit 9100XXi, incl welding filter (73×107 mm) and front cover 9100XXi.

Welding helmets – without safety helmet

Part No	Description
58 26 00	With QR rail, without welding filter.
58 26 15	With QR rail and Speedglas welding filter 9100X.
58 26 25	With QR rail and Speedglas welding filter 9100XX (54×107 mm).
58 26 26	With QR rail and Speedglas welding filter kit 9100XXi and rail, incl welding filter (73×107 mm) and front cover.

Alternative 3M™ Speedglas™ Welding Filters

Part No	Description
50 00 01	Passive filter kit 9100, shade 11 (90×110 mm).
50 00 05	Auto-darkening filter 9100V, variable shade 5, 8, 9–13 (45×93 mm).
50 00 15	Auto-darkening filter 9100X, variable shade 5, 8, 9–13 (54×107 mm).
50 00 25	Auto-darkening filter 9100XX, variable shade 5, 8, 9–13 (73×107 mm).
50 00 26	Auto-darkening filter 9100XXi variable shade 5, 8, 9–13 (73×107 mm).

Distance bar

To avoid scratches on the larger welding filters (9100X, 9100XX, 9100XXi) when raising the welding helmet, we recommend using this distance bar (included when you buy a complete helmet with these welding filters). Also sold as spare part.

Part No 53 11 00

Ear muff bar

When using ear muffs, we recommend you to install this ear muff bar to widen the 9100-QR welding helmet.

Sold as separate accessory.

Welding and grinding respiratory systems

Still using an older version of our welding respiratory helmets?

Did you know you can easily upgrade to our current premium welding helmets, without buying a new Adflo or Versaflo system?

Our 9100 series helmets feature the QRS (Quick Release Swivel) type of breathing tube, which enables one-handed connection and release.

Below you will find ordering information to get a helmet kit, including welding filter and breathing tube. To help protect your new helmet system from scratches, we include a special Speedglas storage bag for free.

1) Included as standard when you order a complete respiratory system with welding helmet and air delivery unit; must always be used.
 2) For welders working at higher altitudes there is a special respirator version to adjust for changes in air density: 3M™ Adflo™ High Altitude Turbo.
 3) Gas filter must always be used together with a particle filter and we recommend to use a heavy-duty battery (sold separately: 83 76 31). In some configurations it is also required to use a breathing tube with silencer (non-QRS: 83 40 08) in combination with a QRS breathing tube adapter (53 35 05), always verify approved combinations with your Safety Engineer or contact a certified Industrial Hygienist for advice.

3M™ Adflo™ Powered Air Respirator

Respirator without headtop – standard battery

Part No	Description
83 77 30	Adflo respirator with self-adjusting breathing tube QRS, breathing tube adapter, airflow indicator, prefilter, spark arrestor, particle filter, battery, belt and charger.

For gas filter configuration we recommend using the Adflo respirator with heavy-duty battery.

Respirator without headtop – heavy duty battery

Part No	Description
83 77 31	Adflo respirator with self-adjusting breathing tube QRS, breathing tube adapter, airflow indicator, prefilter, spark arrestor, particle filter, heavy-duty battery, belt and charger.

For gas filter configuration please add these items to above order:
83 72 42 for gas filter A1B1E1, or
83 75 42 for gas filter A2.

High Altitude Respirator – standard or heavy duty battery

Part No	Description
83 78 30	Adflo High Altitude respirator with self-adjusting breathing tube QRS, breathing tube adapter, airflow indicator, prefilter, spark arrestor, particle filter, battery, belt and charger.
83 78 31	Adflo High Altitude respirator as in 83 78 30 but with heavy-duty battery.

For gas filter configuration please add these items to above order:
83 72 42 for gas filter A1B1E1, or
83 75 42 for gas filter A2.

Standard battery

Don't get weighted down. A lightweight lithium-ion battery pack designed for the Adflo respirator.

- Run time 7–9 hours¹⁾
- Charging time 4 hours
- Compact and lightweight

Heavy-duty battery

Find your endurance. A high-capacity lithium-ion battery pack extends the operating hours of the respirator.

- Long run time 10–13 hours¹⁾
- Charging time 5.5 hours
- Compact and lightweight

3M™ Adflo™ Battery Charger Organizing Stand

The 6-position battery charger organizing stand for Adflo battery chargers provides the ability to charge six batteries at the same time. Saving both time and hassle. Compatible with legacy NiMH batteries and the new Li-ion batteries. Flexible installation: either mount on wall or stand-alone.

Part No: 83 37 06

V-100E Air cooling supplied air regulator, including belt.

Part No **Description**
V-200E Air heating supplied air regulator, including belt.

3M™ Aircare™ Filtration Systems

To make the quality of the air supply breathable, oil aerosols, water vapour, particulates, and non-toxic, unpleasant odours must be removed to EN 12021 requirements. The 3M™ Aircare™ Filtration Systems ACU-3 (wall mount) and ACU-4 (floor mount) provide three-stage filtration for up to three users or two users plus an air tool.

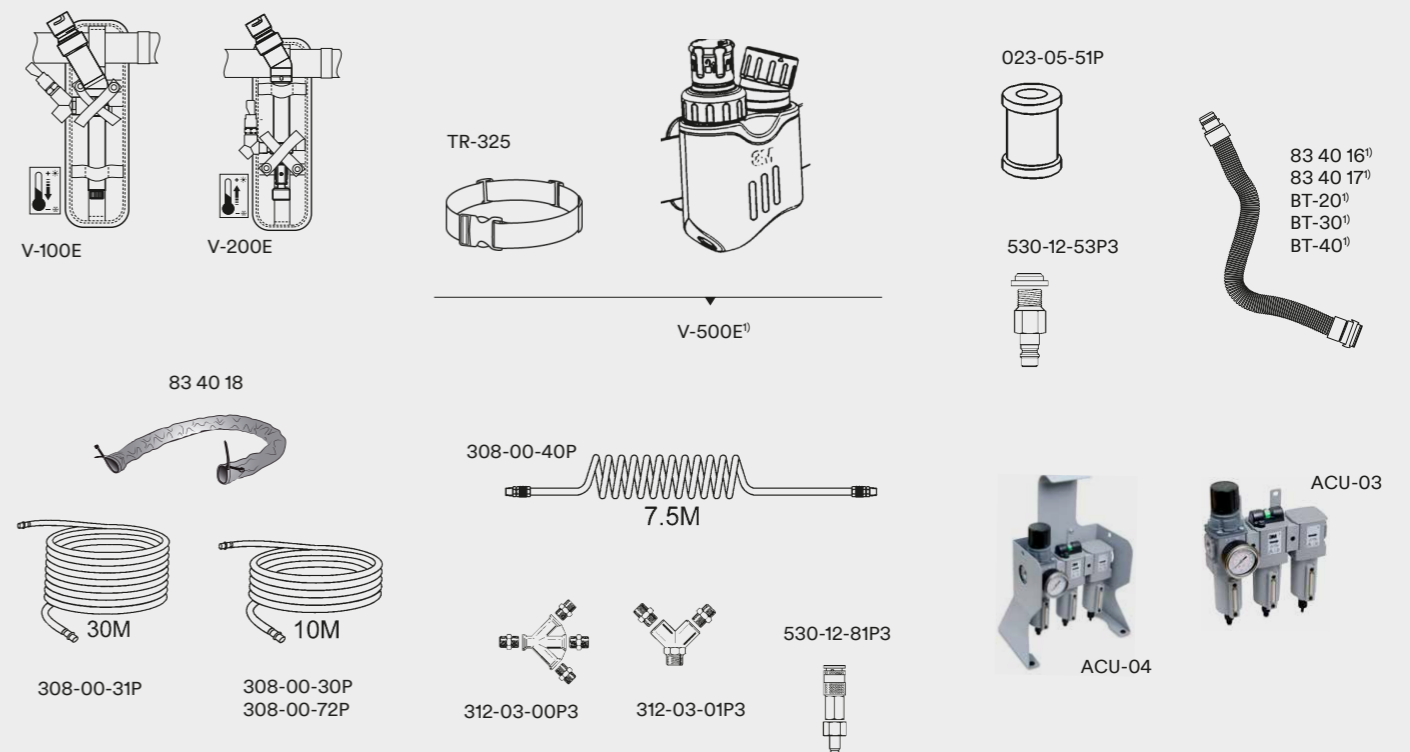

- A** Differential pressure indicator
- B** Pressure regulator (lockable)
- C** Pressure gauge
- D** Pre-filter
Semi Auto Drains (stage 1, 2) and Manual Drain (stage 3)
- E** Coalescing filter
- F** Absorber filter with activated charcoal

16 80 10	Sweatband 9100 MP, pkg of 2.	52 70 01	Outer protection plate extra scratch resistant, pkg of 10.	53 50 01	Helmet air flow deflector for 9100 MP-Lite.
16 80 11	Sweatband 9100 MP-Lite, for TH3 level of protection pkg of 2 (not included in M-150).	52 70 70	Outer protection plate heat resistant, pkg of 10.	53 62 00	Headband ratchet.
16 90 01	Neck protection.	52 80 05	Inner cover plate for 9100V filter, pkg of 5. Plate marking 117×50.	54 05 00	Front cover kit.
16 90 14	Safety helmet cover.	52 80 06	Inner cover plate, +1 shade for 9100V filters, pkg of 3.	57 04 95	Outer shield.
16 90 15	Shroud.	52 80 07	Inner cover plate, +2 shade for 9100V filters, pkg of 3.	57 08 95	Inner shield.
17 10 20	Magnifying lens 1.0.	52 80 15	Inner cover plate for 9100X filter, pkg of 5. Plate marking 117×61.	57 28 00	Welding helmet 9100MP, without welding filter.
17 10 21	Magnifying lens 1.5.	52 80 16	Inner cover plate, +1 shade for 9100X filter, pkg of 3.	59 28 00	Welding helmet 9100 MP-Lite, without welding filter.
17 10 22	Magnifying lens 2.0.	52 80 17	Inner cover plate, +2 shade for 9100X filter, pkg of 3.	89 60 55	Safety helmet 9100 MP, incl head suspension and sweatband.
17 10 23	Magnifying lens 2.5.	52 80 25	Inner cover plate for 9100XX/9100XXi filters, pkg of 5. Plate marking 117×77.	89 60 56	Safety helmet 9100 MP-Lite, incl head suspension and sweatband.
17 10 24	Magnifying lens 3.0.	52 80 26	Inner cover plate, +1 shade for 9100XX/9100XXi filters, pkg of 3.	79 01 01	Product storage bag.
19 71 50	Flip-up mechanism.	52 80 27	Inner cover plate, +2 shade for 9100XX/9100XXi filters, pkg of 3.	M-150	Head suspension for 9100 MP-Lite.
19 71 51	Pivot kit.	53 10 00	Battery holder, pkg of 2.	M-350	Head suspension for 9100 MP.
42 20 00	Battery CR2032 Lithium 3V, pkg of 2.	53 20 16	SideWindow cover plates.	M-958	Chin strap.
50 00 05	Speedglas welding filter 9100V.	53 42 00	Face seal.	X1P3	3M™ Peltor™ Ear Muffs X1 (26 dB). ¹⁾
50 00 15	Speedglas welding filter 9100X.			X2P3	3M™ Peltor™ Ear Muffs X2 (30 dB). ¹⁾
50 00 25	Speedglas welding filter 9100XX.			X3P3	3M™ Peltor™ Ear Muffs X3 (32 dB). ¹⁾
50 00 26	Speedglas welding filter 9100XXi.			X4P3	3M™ Peltor™ Ear Muffs X4 (32 dB). ¹⁾
52 30 00	Visor plate, standard, pkg of 5.			X5P3	3M™ Peltor™ Ear Muffs X5 (36 dB). ¹⁾
52 30 01	Visor plate, anti-fog, pkg of 5.			Z3AF/2	Helmet assembly parts for Peltor X-series ear muffs, left and right.
52 60 00	Outer protection plate, standard, pkg of 10.				
52 70 00	Outer protection plate scratch resistant, pkg of 10.				

1) Please add assembly parts Z3AF/2 when ordering ear muffs for 9100 MP and 9100 MP-Lite welding helmets.

3M™ Speedglas™ Welding Helmet Series 9000 for respiratory protection

Spare parts & accessories

Part No	Description	Part No	Description	Part No	Description
16 40 05	Ear and neck protection in leather.	42 60 00	Outer protection plate, standard, pkg of 10. Plate marking 42 01 50.	43 20 02	Front cover.
16 40 09	Head protection.	42 70 00	Outer protection plate, scratch resistant, pkg of 10. Plate marking 42 01 00.	43 20 15	Side windows cover plate (sticker), 5 pairs.
16 60 20	Assembly parts for headband.	42 70 71	Outer protection plate, heat resistant, pkg of 10. Plate marking 42 01 71.	43 30 00	Headband with air duct.
16 75 20	Sweatband, towelling, pkg of 2.	42 80 00	Inner cover plate (42×91 mm), pkg of 5. Plate marking 42 02 00.	43 30 10	Air duct.
16 76 00	Sweatband, towelling, pkg of 20.	42 80 10	Inner cover plate (53×103 mm), pkg of 5. Plate marking 42 02 10.	43 30 60	Headband without air duct.
16 80 00	Sweatband, leather.	42 80 20	Inner cover plate (42×91 mm), +1 Shade, pkg of 5.	43 40 01	Face seal.
16 80 12	Sweatband, fleecy cotton, pkg of 2.	42 80 30	Inner cover plate (53×103 mm), +1 Shade, pkg of 5.	43 50 00	Air spreader.
16 90 01	Neck protection.	42 80 40	Inner cover plate (42×91 mm), +2 Shade, pkg of 5.	44 05 00	FlexView kit.
16 91 00	Hood.	42 80 50	Inner cover plate (53×103 mm), +2 Shade, pkg of 5.	44 10 00	Middle helmet FlexView, black.
17 10 20	Magnifying lens 1.0.	43 10 00	Battery cover, pkg of 2.	44 20 00	Heat-reflecting front cover FlexView, silver.
17 10 21	Magnifying lens 1.5.			80 31 10	Tightening kit for Speedglas 9000 welding helmet, not shown.
17 10 22	Magnifying lens 2.0.				
17 10 23	Magnifying lens 2.5.				
17 10 24	Magnifying lens 3.0.				
19 71 40	Holder for welding filter (FlexView).				
42 20 00	Battery CR 2032 Lithium 3V, pkg of 2.				
42 30 00	Protective visor plate FlexView, pkg of 10.				

3M™ Safety Helmet H-701

The 3M™ Speedglas™ Quick Release (QR) Rail allows you to attach a Speedglas welding helmet to many of the industry's most popular safety helmets. 3M offers complete QR welding helmet system

including the white, unvented 3M™ Safety Helmet H-701. The safety helmet is available in 6 colours when you buy it separately, see below.

3M™ Versaflo™ M-Series Headtops

Spare parts & accessories

Part No	Description	Part No	Description	Part No	Description
16 80 10	Sweatband, fleecy cotton, pkg of 2.	BT-40 ¹⁾	Breathing tube, heavy-duty rubber, with QRS connection.	M-972	Flame resistant headtop cover.
83 40 08	Breathing tube with silencer, non-QRS.	M-116	Airflow deflector (M-107).	M-976	Head, neck and shoulder cover.
83 40 16	Breathing tube, self-adjusting (52,5 to 85 cm), with QRS connection.	M-150	Head suspension (M-107).	X1P3	3M™ Peltor™ Ear Muffs X1 (26 dB). ²⁾
83 40 17	Breathing tube, heavy-duty rubber, with QRS connection.	M-154	Forehead seal (M-107).	X2P3	3M™ Peltor™ Ear Muffs X2 (30 dB). ²⁾
83 40 18	Flame resistant breathing tube cover.	M-316	Airflow deflector (M-307).	X3P3	3M™ Peltor™ Ear Muffs X3 (32 dB). ²⁾
84 77 20	Versaflo faceshield M-107 with Adflo powered air respirator.	M-350	Head suspension (M-307).	X4P3	3M™ Peltor™ Ear Muffs X4 (32 dB). ¹⁾
85 77 20	Versaflo helmet M-307 with Adflo powered air respirator.	M-354	Forehead seal (M-307).	X5P3	3M™ Peltor™ Ear Muffs X5 (36 dB). ¹⁾
BT-20 S&L ¹⁾	Breathing tube, polyurethane (in two lengths), with QRS connection.	M-919	Visor frame buttons.	Z3AF/2	Helmet assembly parts for Peltor X-series ear muffs, left and right.
BT-30 ¹⁾	Breathing tube, self-adjusting (52,5 to 85 cm), with QRS connection.	M-920	Visor frame.	M-107	Faceshield M-107
		M-921	Visor gasket.	M-307	Helmet M-307
		M-925	Visor standard (uncoated), molten metal splash protection to EN166.	M-407	Helmet with shroud M-407.
		M-927	Visor coated.		
		M-928	Peel-off visor cover.		
		M-937	Flame resistant faceseal.		
		M-953	Ratchet.		
		M-956	Ratchet comfort pad.		
		M-958	Chin strap.		
		M-960	Pivot kit.		

For powered air respirator options, please see page 18. For supplied air regulator options, see page 20.

1) When the V-500E regulator is used with Versaflo headtops M-Series, the BT-Series breathing tubes must be used.
2) Please add assembly parts Z3AF/2 when ordering ear muffs for Versaflo Headtops M-Series.

3M™ Protective Visor for respiratory protection

Spare parts

Part No	Description
16 40 09	Head cover flame-resistant.
16 80 12	Sweatband.
80 30 10	Headband, with air duct.
80 30 60	Headband, without air duct.
80 40 05	Face seal.
85 30 56	Breathing tube, with nipple, silencer and fastening details.
89 10 13	Hook and loop Velcro face seal, pkg of 2.
89 90 40	Protective Visor, clear, polycarbonate, with face seal, without brow protection.
89 90 41	Protective Visor, clear, acetate, with face seal, without brow protection.
89 90 45	Protective Visor, DIN 5, polycarbonate, with face seal, without brow protection.
89 90 51	Brow protection (powered air).
89 90 60	Protection film, pkg of 5.
89 91 40	Protective Visor, clear, polycarbonate, with face seal, without brow protection.
89 91 41	Protective Visor, clear, acetate, with face seal, without brow protection.
89 91 45	Protective Visor DIN 5, polycarbonate, with face seal, without brow protection.
89 91 51	Brow protection (supplied air).

Product features

More details about the product features referenced on pages 29–39

Auto-ON	A motion-sensor instantly turns ON the 3M™ Speedglas™ Welding Filter 9100XXi when you pick up the helmet.
Exhaust vents	Exhaust vents readily direct your exhaled air out of the helmet and reduces the likelihood of a foggy welding filter.
Flip-up	The 3M™ Speedglas™ Welding Helmets 9100 FX and 9100 FX-Air have a flip-up combination of an auto-darkening welding helmet and a big, curved 17x10 cm clear protective visor. In a quick lift of the silver front you get a clear view, great for precision grinding in low light conditions.
Graphics	3M™ Speedglas™ Welding Helmet Series 100 deliver impressive protection with distinctive graphic designs – all with a specific identity. Find them all at page 78.
Head protection	Designed to fit many of the industry’s safety helmets, the 3M™ Speedglas™ Quick Release (QR) Rail swiftly clasps onto your safety helmet via a releasable ratcheting mechanism. With the rail installed, you can easily detach the welding visor, keeping your safety helmet protection in place as you perform non-welding tasks. The 3M™ Speedglas™ Welding Helmet 9100 MP offers a safety helmet approved to EN 397 440 Vac, LD. As a lighter alternative we now introduce the 3M™ Speedglas™ Welding Helmet 9100 MP-Lite, incorporating a bump cap approved according to EN 812.
Mechanical strength	Welding helmets incorporating protective filters are covered by the standards EN 175, EN 166 and EN 169 (passive filters) or EN 379 (auto-darkening filters). The protective visors are covered by EN 166. In EN 175 and EN 166, the PPE is classified according to its mechanical strength: increased robustness (S) or resistance to high speed particles (F or B). In EN 166, it is optional to complement the classification for mechanical strength with the letter (T) for extremes of temperatures (-5° C and +55° C). Classification of mechanical strength Class S – Increased robustness (drop ball test 5.1 m/s). Class F – Resistance to high speed particles at low energy impact (45 m/s). Class B – Resistance to high speed particles at medium energy impact (120 m/s). Note: Products classified in class B are not made to give total protection under all possible circumstances, e.g. when using grinding wheels/grinding machines.
Natural Colour Technology	3M™ Speedglas™ Natural Colour Technology may allow you to see your weld pool more accurately. And read surfaces better. Plus you can better discern coloured machine controls and displays while looking through the welding filter. More details on page 14-15.
Powered air respirator	The European standard for a complete powered air filtering device incorporating a face helmet or visor is EN 12941. There is no separate classification for particle filters (P) in the standard EN 12941 as the particle filter is part of the system classification. Standard EN 12941 defines three classes of performance (TH1, TH2 and TH3). The numbers define the level of performance (inward leakage) and the pull strength of the breathing tubes and couplings within the classification. Inward leakage for classification TH1 is maximum 10%, for TH2 maximum 2% and for TH3 maximum 0.2%.
Side windows	Side windows – shade 5 filters that widen your field of vision. The first time a welder puts on a Speedglas welding helmet with side windows you can see his startled reaction. Previously hidden peripheral hazards (beams, obstacles, other workers) are now easier to see through the two, shade 5 side filters.
Supplied air	Respiratory protection devices with supplied air line breathing apparatus is in scope of EN 14594. The apparatus is not self-contained and the air line supply must be air of breathable quality meeting the requirements in EN 12021.

Helmet selection guide

Which welding helmet?

Your personal guidance to Speedglas™ Welding Helmets. Answer 10 questions on your mobile to find recommendations to the welding helmets best suited to your specific needs.

3M Welding Centre of Excellence

Hundreds of thousands of times each day, welders all over the world rely on their 3M™ Speedglas™ products to achieve their best welding performance. A result of our close cooperation with welders, safety engineers and ergonomic specialists to constantly improve the performance and comfort of our products.

35

More than 35 years ago we turned the world of welding on its head by introducing the auto-darkening welding filter.

The Welding Lab in Gagnef has currently 25 employees and our business effort is that 3M should become the No 1 supplier of welding PPE that improves productivity and customers' profitability.

3M Welding Lab Gagnef – Expert Areas

Ground breaking Innovations

Ongoing customer support

To help keep your equipment working as it should, and to ensure you get the most from your investment, our support team at 3M is able to offer assistance on several levels:

Care & Maintenance Posters

Guidance on the appropriate maintenance checks is provided in the user instructions supplied with all new equipment. Our Care & Maintenance Posters make this information available on a day-to-day basis and are a strong and visual reminder.

Welding Specialists

Based across the country and supporting 3M distributor network, our welding specialists have a sound understanding of national health and safety laws coupled with years of experience in the welding market.

Helpline

Call **0870 60 800 60 (UK)** or **1 800 320 500 (Ireland)** for any technical queries. For other countries please find your local contact information at **www.3M.com**.

 **@3M_UK_Safety**
