

Version: Chamfering machine with smooth start-up and thermal overload protection in compact design for machining straight edges, internal and external radii and holes from Ø 22 mm. Fine adjustment permits light chamfering for deburring and also wide chamfering (0 – 8 mm at 45°).

Supplied with: Milling head, **3 carbide** inserts, swarf hook No. 08 4510, transport case and operating tools.

Note: A component edge height of at least 2 mm is necessary to provide guidance.

Size = Manufacturer's designation			EKF450
07E 07 8121	BDS Deburring and chamfering machine	45° chamfer	XXX
Power supply / motor power		V / W	230 / 1500
Speed		rpm	6000
Machine dimensions L×W×H		mm	310×138×295
