Adhere well, long lasting, easy to use with Osborn Cotton and Sisal Mops, Felts.

Recommendations For Use

Polishing or brightening precious metals. Use with soft cloth mops.

Bright polishing of hard alloys like white gold, platinum, chrome and stainless steel. Also suitable for silver. Use with soft cloth mops.

Perfect for sterling silver and other silver alloys. Good reflection properties. Use with soft white mops or cloths.

Versatile choice to polish a range of metals including silver. Use with soft white mops.

Cutting compound for softer metals: plastics, resins and lacquer. Use with harder stitched cotton cloth mops.

Cutting compound for harder metals: steel, stainless steel and platinum. Use with harder mops made of sisal or close stitched cotton cloth.

Cuts well, removes deeper scratches and refreshes stainless steel. Use with a cloth or close stitched cotton cloth mops.

Final finishing on silver. Use with close stitched cotton mops

Dry ultra-fine rouge for gold and silver finishing.

High quality Tripoli composition.

Economical composition for finishing chrome-plate, stainless steel and non-ferrous metals.

Finishing composition for steel and stainless steel.

Materials

Available materials

CHUNGKING

Strong, elastic and heat resistant. The filaments are first washed and boiled 3 times at more than 100°C over a period of 7 hours in order to eliminate all bacteria.

HORSE HAIR OR GOATS HAIR

The horse hair or goat hair first maintains the quality guarantees since the beginning of production. After the washing process, the hair is brushed to guarantee the final filament size.

Horse Hair or Goat Hair

Low capacity to absorb static. Good for polishing and cleaning residue.

TAMPICO

Tampico Fibre is a natural fibre produced by the Agave plant (Mexico). Tampico fibre can be used dry or with compound which adheres well to the fibres.

Tampico

No accumulation of static, used for metal polishing even in applications where temperatures up to 450°C are reached.

SYNTHETIC FIBRE - NYLON

Polyamide (PA) also referred to as Nylon Fibre is a thermoplastic material.

Nylon

Polyamide may be used for dusting, removing compound, cleaning liquid and grease, also in surface finishing.

Polypropylene

Water and chemical product resistance, used in galvanizing industries and similar

ABRASIVE NON WOVEN

Non-woven abrasive consists of nylon fibres with abrasive grit particles and resin. Grit can be varied from 80 - 320 to achieve different finishing results.

Aluminium Oxide Non - Woven

WIRE

All wire used is calibrated during drawing, no oils or other substances are present.

Crimped Steel

For a deep satin finish or for brushing and cleaning of hard materials.

Crimped Stainless Steel

To achieve a satin finish on non-ferrous metals.

Bessemer Steel

For a fine satin finish and for softer cleaning processes.

Brass

For a satin finish on non-ferrous metals.

COTTON

Cotton cloth has a low flammability level is good for polishing and other fine finishing processes.

Regular Cotton Yarn

Treble twist

Twisted Cotton Yarn

3x3 twist

Cotton Cloth

Available in various grades - harder types for cutting, softer types for colouring.

FIBRE

A non-woven material made with synthetic fibres and no abrasive. Good absorption capacity and low flammability.

Notiflex®

FELT

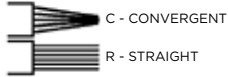

A non-woven made with synthetic fibres and no abrasives. Available in various strengths. Used in cleaning operations with and without compounds.
